This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

LIBRARY

Preface.

THIS system of Classification has been compiled in response to a demand from many librarians in the United Kingdom for a greatly extended version of the *Adjustable Classification*, which was published in 1898. That system was not fully indexed, and its main classes and divisions are only worked out in detail here and there, to suit the needs of the smaller British municipal libraries. There was, in consequence, plenty of room for a much more elaborate and complete scheme, suited to the requirements of British libraries of all kinds and sizes, and this system of Subject Classification is the result. Its plan and method of application are set out so fully in the Introduction, that there is no need to explain here the principles of its construction or aim. The attempt to supply a complete classification of literature for libraries and general educational purposes could be justified on many grounds, but it will be sufficient to claim that a simple, fairly logical and practical method has long been wanted in British libraries.

My best thanks are due to various librarians, and others, who have aided me with suggestions and plied me with unstinted criticism. Without such help the work would be much more incomplete than it is, and I have, therefore, to express my gratitude for the stimulus and aid afforded in so many ways by numerous specialists in different departments of knowledge. In particular I owe very warm thanks to Mr. James D. Stewart, of the Islington Public Libraries, who aided in the laborious work of indexing the scheme, and by his practical acquaintance with other systems, and the work of applying strict classification to books, greatly lessened the drudgery of compilation. I am also indebted to Messrs. R. K. Dent and L. S. Jast, for the suggestive tables printed in the Introduction; and to Miss Alice Jones, of the Islington Public Libraries, for carefully reading the proofs. Notifications of errors and omissions will be thankfully received and acknowledged.

JAMES DUFF BROWN.

15, Canonbury Park South,
London, N.

Introduction.

1. Some observations on the theory of Classification are perhaps necessary, before entering upon a detailed explanation of the method of applying this scheme to books or libraries.

For many hundreds of years it has been a pet exercise of philosophers and logicians to arrange the varied constituents of human knowledge according to some well-ordered plan, which would assemble in one place, and in immediate proximity to kindred topics, all the books or facts relating to a specific subject. Most of these plans have been discussed at great length ; some have been approved with reservations, and others condemned outright without reservation. Some of them are the work of great thinkers, and others the experiments of practical men of affairs, in quest of labour-saving devices to facilitate business. No single system of classification succeeds in just exactly suiting its user, or satisfying the demands of other classifiers, from which it may be judged that the whole subject is one of immense difficulty and complexity. To begin with, very few men of science or philosophical theorists can agree as to the exact order of progression to be observed in the arrangement of the main divisions of human knowledge. Each, according to his training or prepossessions, will seek to place his own pet subject of study in the forefront of the sequence, and let all subjects of less personal interest tail off into an indefinite perspective of diminishing value. Thus, the physical science specialist will argue that force and radiation are the genesis of all actions, thoughts or accomplishments, and will therefore plan his scheme of classification to show Physics occupying a leading or central position, from which will be dominated every other science or study. On the other hand, the historical classifier will show in his scheme that the physical sciences are a mere incident in the progress of the world from pre-historic to present times, and promptly relegate them to one of the many annexes of General History, as a useful but by no means indispensable collateral study. The metaphysician will claim pride of place for his special study, on the ground that Ideas precede either matter or record, and will then spread out the foundations of knowledge according to a radically different conception of their relative values and kinds. The sociologist will tell you that nothing in the whole course of human endeavour possessed the slightest significance till mankind became formed into society, with groups capable of discussing all kinds of phenomena, and so he will make every other subject a minor detail in the predominating sociological structure. But the jurist will tell you that such an order is erroneous, as nothing could be discussed, or even formulated, till the establishment of Law in all its varied intricacies. To this the theologian will retort that only Divine Law can be recognised as the foundation of human knowledge, and proceed to show that science, history, law, and art are but different manifestations of religious belief.

The mathematician will tell you that everything in existence is but an expression of Number; while the logician will claim that only reason and system can be properly taken as a basis for classification. As for the chemist ——! Finally, the anthropologist will come along and sweep everyone of the preceding claimants, and all others, into his capacious net, and calmly assert that his study is Man in all his aspects, and that every human science is, therefore, but a branch of Ethnology.

2. The result of these many claims to sovereignty, preferred on behalf of such a number of important sciences, is that Classification has become a mere battlefield for theorists, from which nothing of a very definite or permanent kind has emerged. Systems of classification to suit every theory have been devised, and, in addition, schemes have been prepared in which attempts have been made to meet the needs of every specialist, by endeavouring to gather at one place everything relating to his special subject. The result is that the special schemes based on particular theories, or which treat some select science as paramount, fail because of their limitations outside the favoured field; while the universal schemes, which try to specialize for everybody, fail because they are swollen by endless and needless repetitions, and then do not meet the minor needs of the specialist.

It is inevitable that these failures should result from any attempt to classify human knowledge from particular standpoints. The departments of human knowledge are so numerous, their intersections so great, their changes so frequent, and their variety so confusing, that it is impossible to show that they proceed from one source or germ, or that they can be arranged so that each enquirer will find the complete literature of his special subject at one fixed place. Subjects overlap and qualify each other in every conceivable manner, and they are further complicated by considerations of literary form and the points of view from which they may be studied. Every subject is capable of being treated from a large number of standpoints, and each of these may be the centre of an enormous literature, and form an important study. To illustrate this, I shall assume that there are some thousands of books existing, which have for their theme the Rose in every conceivable aspect. This subject may be considered from any of the following standpoints:—

Biological, Botanical, Horticultural, Historical, Geographical, Ethical, Decorative, Legal, Emblematical, Bibliographical, Poetical, Musical, Sociological, and so on, to any extent.

Works about the Rose may assume the form of Dictionaries, Periodicals, Societies, Catalogues, and so forth; while it may also be considered in reference to Costume, Perfumery, Therapeutics, and similar subjects. Now, it is quite evident that, while there would be enormous practical convenience to the Rose student in having all his material gathered together at one place, so that the literature of the subject would appear in a sequence of forms, categories and standpoints, the same advantage would not be gained by the perfumer, gardener, botanist or bibliographer, who wanted to find all his material assembled at one place. The problem to be solved becomes, therefore—Is it better to assemble at a specific place, or at a more general place, the literature of a concrete subject? To show it more graphically, let me take the case of a work entitled *Bibliography*

of the Rose and show the aspect of the problem when displayed in tabular form under general and more local heads :—

General System.		Local System.	
M760	Bibliography, General.	E600	Rose, General
M760.2	— Encyclopædias	E600.1	— Bibliography
M760.7	— Periodicals	E600.2	— Encyclopædias
M760.10	— Histories	E600.7	— Periodicals
	Special subjects—	E600.10	— History
M760.183	Architecture		
M760.371	Biology		
M760.441	Botany		
M760E570	Rosales		
M760E600	Rose		

It certainly appears that the balance of advantage lies with the assignment of the subject to a local head in this particular instance, but it would, in the case of a collection of books, deprive the bibliographer of part of his material. On the other hand, it must be argued that if the bibliographer is able to have all the general and abstract bibliographical works gathered at one place, it will just be as convenient for him to go elsewhere for the special literature of subjects not of themselves bibliographical. It is further to be considered to whom such a book as *The Bibliography of the Rose* would most appeal, and here there can be no disputing the fact that the rose lover would be in an enormous majority. For this reason, and it has a wide general application, I incline to think that, in book classification, the constant or concrete subject should be preferred to the more general standpoint or occasional subject. The topic Rose is concrete; that of Bibliography is standpoint, and should remain subordinate whenever possible in Classification. But this does not prevent anyone who prefers to use a general head from doing so, as it is only necessary in such a case to apply the general number and qualify or subdivide by the categorical tables, or by combining specific numbers from the classification tables.

3. Constant Place.—In assigning places for a large number of books or topics, there is often a choice offered between two or more enquirers or specialists, and it lies with the classifier to decide which of these has the strongest claim. In general libraries the difficulty can be overcome in many cases by determining how far the subject has constant or only occasional interest for the enquirer. In the case of a book entitled *British Library Law*, the question would arise as to whom such a work would be most constantly useful. As the librarian is daily engaged in applying the law which regulates his work and defines some of his powers, it is perfectly clear that to him, rather than to a lawyer, the book is constantly useful. A lawyer may never have occasion to refer to Library Law in the whole course of his professional career, or may only do so on a few special occasions, consequently the librarian must, in this case, have the preference. Again, a book entitled *Library Architecture* is exactly in the same position. It may never be required by an architect, but is almost inevitably required for constant reference by a librarian, and its place is, therefore, with other books on librarianship. Buildings are designed

to meet certain requirements and to perform certain work. An architect simply follows out certain instructions and carries out merely temporary duties in devising a building according to certain recognised principles of construction. He does not originate the purpose or main arrangements of the building, nor has he to work it as a machine afterwards. All this is done by a different kind of specialist, who only employs the architect as an occasional aid. Such special works as books on the architecture of libraries, churches, slaughter-houses, barracks, hospitals, baths, etc., have, therefore, no special right to be arbitrarily placed under the general class of architecture, but should be put with their actual subjects, where they would be in comparatively constant demand, and close to all relative aspects of this topic. These are strong reasons why, in general libraries, only general and intimately germane subjects should be made the essential divisions of a main class. Subjects which are not general, but feed a more constant demand, should appear as divisions or sub-divisions, or categories of the classes to which they are constantly germane. It would be possible to give many other examples to prove the utility of this rule of preferring a constant to an occasional standpoint for classifying, but it is hardly necessary, as no one can doubt its immense value in the classification of general libraries. With special collections it would, in some cases, be difficult, as in such libraries the necessity for specialisation is more urgent, and many instances will occur of books offering a choice of subjects which may seem of equal rather than of constant or occasional importance. In such cases the classifier must consider the special needs of his collection, and assign places accordingly.

4. Classification *versus* **Cataloguing.**—One of the principal causes of confusion in the classification of knowledge, as contained in books, is the failure to distinguish between classification and cataloguing. Classification may be defined as the art of placing one copy of a book in that part of a library where all similar books on the same subject are kept. It is physically impossible to make the same copy of one book act as a cross-reference from a standpoint to a concrete subject, or *vice versa*, because it can only occupy one place at a time, and no one would dream of using ten, twenty or one hundred copies of the same book in order to place one at every subsidiary subject of which it treated. The problem of classification is thus complicated by the physical necessity, imposed by the form of books, of choosing only one place in which to class a given book; and, naturally, it is to be supposed that the place chosen will be the most useful, or one most likely to be resorted to by the largest number of enquirers. With cataloguing there is no such physical difficulty. The entry of a book can be multiplied to almost any extent; a book can be shown under every imaginable subject; cross-references of all kinds can be easily made; and no question can arise of increasing the number of books or the size of the library. It is largely due to a misunderstanding of the fact that a catalogue is to a great extent but an index to a scheme of classification, that so many persons obtain the idea that books in an actual arrangement on the shelves should appear at every possible class, phase, form or subdivision. It is very important that this fact should be borne in mind in every question relating to exact classification, because no scheme, however detailed, can be made to serve the purpose of a catalogue in all

that relates to repeated entries, cross-references, and the assembling at various heads of the whole literature of a topic, whether contained in special or in composite and encyclopædic works.

SUBJECT CLASSIFICATION.

5. General Principles.—Like every other system of exact classification, this one is arranged, as regards its main divisions, in a logical order, or at any rate, according to a progression for which reasons, weak or strong, can be advanced. Its basis is a recognition of the fact that every science and art springs from some definite source, and need not, therefore, be arbitrarily grouped in alphabetical, chronological or purely artificial divisions, because tradition or custom has apparently sanctioned such a usage. The divisions seen in most classifications in vogue—Fine Arts, Useful Arts and Science, are examples of the arbitrary separation of closely related subjects, which in the past, have become conventional, and it may seem heretical even at this late time to propose a more intimate union between exact and applied science. Nevertheless, this is what has been attempted here, and those who use the scheme will find many departures from established convention which may at first sight appear a little drastic. The alliance of Architecture and Building, Acoustics and Music, Physical Electricity and Electrical Engineering, and other groupings of a similar kind are departures from the convention that there exists a clear difference between theory and practice, pure and applied science, and so on, which renders their amalgamation undesirable. The old distinction between theoretical and applied science is gradually disappearing from all modern text-books, and it is obvious that, as the systematisation of science and its teaching improve, the separation between physical basis and practical application, hitherto maintained, will no longer be insisted upon. In this scheme of Subject Classification every class is arranged in a systematic order of scientific progression, as far as it seemed possible to maintain it; while applications directly derived from a science or other theoretical base, have been placed with that science or base. Composite applications of theory have been placed with the nearest related group which would take them without strain, and, as a general rule, all through the classification the endeavour has been to maintain a scheme of one subject, one place.

6. The Order of the Main Classes.—The reasons which determined the adoption of a certain sequence of classes in this system may be briefly set forth here, instead of any argument or attempt to justify the order. The battle which has raged, and is still raging, among scientists, as to the best and most desirable order in which to arrange the great branches of human knowledge in order to produce a "hierarchy," must deter a non-scientific classifier from arguing on such a complicated and difficult topic. It will, therefore, suffice, if I briefly describe the main classes in their order and give reasons why they were assigned to the places they occupy.

A GENERALIA.—The divisions of this main class comprise most of the rules, methods and factors which are of general application, and which qualify or pervade every branch of science, industry or human study. They are universal and pervasive, and cannot be logically assigned to any other single main class as peculiar or germane to it.

B–C–D PHYSICAL SCIENCES.—Matter, force, motion and their applications are assumed to precede life and mind, and for that reason the material side of science, with its applications, has been selected as a foundation main class on which to construct the system.

E–F BIOLOGICAL SCIENCE.—Life and its forms, arising out of matter, occupy the second place among the main classes, and here are put general biological theories and facts, followed by plant and animal life, each in an ascending order from low to high forms of organization.

G–H ETHNOLOGICAL AND MEDICAL SCIENCE.—Human life, its varieties, physical history, disorders and recreations, follows naturally as a higher development of plant and animal life, and completes the biological chain.

I ECONOMIC BIOLOGY AND DOMESTIC ARTS.—The applications of plant and animal life to human needs, placed midway between the physical and mental attributes of man as indicating the primitive exercise of mind, and to assemble in one sequence the chief biological subjects. As a matter of practical convenience, rather than logical necessity, it was thought better to keep composite subjects like Agriculture, Clothing, Foods, etc.—involving questions of origin, use and manufacture—all in one place, close to the main classes from which they are derived, rather than to distribute them more closely at Botany or Zoology.

J–K PHILOSOPHY AND RELIGION.—Mental attributes, order and beliefs of human life, following naturally from its physical basis, and primitive manifestation in the instinct of procuring food and clothing.

L SOCIAL AND POLITICAL SCIENCE.—Social order and laws of human life. Placed here because, although society or family and other tribal organizations may have preceded religion, mind, as embodied in philosophy, must have preceded both.

M LANGUAGE AND LITERATURE.—Communication and recording in human life. The spoken, written and printed word, which grew as a necessity out of the primitive operations of mind.

N LITERARY FORMS.—The products of communication and recording in human life in their more imaginative forms; placed here on the ground that fable probably preceded more formal history.

O–X HISTORY, GEOGRAPHY, BIOGRAPHY.—The actions, records and description of human life and its dwelling place. Arranged in this order and at this place because of their intimate connection. Geography, although logically related to Physiography, and Biography to Ethnology, are, nevertheless, as a matter of practical utility, and because of the literature actually existing, more naturally grouped here than separated.

The order of the classes may, therefore, be briefly described as expressing :—

1. Matter.
2. Life.
3. Mind.
4. Record.

7. The Notation.—After many attempts to secure extreme simplicity in the Notation to be used for the purpose of briefly indicating subjects and groups of subjects, it was found that very short numbers or symbols were impossible in cases of complex topics. As regards the numbering of books, for example, there are many cases in which it is necessary not only to distinguish between a main class and its divisions and subdivisions, but also to indicate locality, form, differences of authorship, of title, of work and even of edition and copy of work. For these reasons it was thought desirable to construct the Notation on the widest possible base, assigning letters of the alphabet to the main classes in convenient groups, and giving numbers to every subject which was thought to possess a large literature. Thus, instead of crowding the Physical Sciences at one letter like B, they have been much more conveniently spread over B, C, D, with the result that important subjects like Railways and Shipbuilding are not mingled together at one number which must be especially sub-divided, but have seventy numbers allotted to them, and each number can be sub-divided to any required degree by means of a separate table of forms and categories. Thus is produced a sequence of main classes, divisions and subdivisions, which are differentiated as far as possible by means of letters, figures, indentations, and varieties of type. The advantage of this plan may be shown by an example from the tables :—

U900 **London**
U901 North of the Thames
U902 West London
U903 Hammersmith
U908 Westminster
U911 Westminster Abbey

Here is clearly shown London in bold type ; then the whole Metropolitan area north of the Thames as a division ; then the area known for administrative purposes as West London ; next the separate boroughs in West London ; and finally, an important historical subject in the city of Westminster as subdivisions. Each of those topics is expressed by a simple symbol, consisting of a letter and three figures, and again each of the subjects can be subdivided by means of the form and categorical tables, without in any way interfering with the numbers of the main tables. All numbers which express classes, divisions or subdivisions are, therefore, the same, the only difference being that subordinate topics or subdivisions are shown by means of indentations. It is thus easy to take any number, whether it represents a subdivision or main division of a topic, and qualify it by various methods.

8. National Numbers.—In using national symbols to qualify a topic, it is necessary only to use the class letter and first figure of the place, and to add to the topic number in order to show subject and locality. Thus,

a general work on Freemasonry in Russia would be marked L185So, instead of L185-Sooo or L185.Sooo. There is no need to divide the topic from the place number by means of dots or dashes, and all through it must be understood that the principal countries are to be expressed by letter and first figure of number only, as shown on the Summary Tables. In the case of extremely minute subdivision it may be necessary to closely localize a topic, say such as Freemasonry in Texas, in which case the number, for clearness, should be L185W328, and not L185W1, which would express the United States and not Texas. None of the National or Race names appear in the Categorical Tables, and it is, therefore, necessary to take them from the full Classification Tables. It is sometimes necessary to qualify a topic by a race or language number instead of a national one, and it is then best to use the whole of the language mark, thus :—

Pali Freemasonry L185M260.

Such subdivisions are, however, rarely required, and it is best under every circumstance to use the geographical rather than the linguistic national numbers.

9. New or Intercalated Numbers.—If any new or other subject is found unrepresented in the tables, either as a general covering head, or special topic, a place for it can be made at any point by treating the existing numbers as decimals, and adding the units from 0 to 9 as found necessary. Thus, suppose places are specially wanted for bodies named Christadelphians, Christian Strugglers, Christian Travellers, Christian Worshippers, and it is necessary to insert them between K951 and K952, they can be added thus :—

K951 Catholic Apostolic Church
K9510 Christadelphians
K9511 Christian Strugglers
K9512 Christian Travellers
K9513 Christian Worshippers
K952 Christian Endeavour Society.

Or, if other intercalations are probable, the odd numbers should be used, so as to still leave room on each side of numbers :—

K951 Catholic Apostolic Church
9510 Blank
K9511 Christadelphians
9512 Blank
K9513 Christian Strugglers
9514 Blank
etc.

By this means ten entirely new places can be found between every existing number, apart from the large number of spaces already purposely left blank all through the classification. Of these there are about 10,000, making with the 14,000 extra places now provided, a total of 24,000. But there is no reason apart from a long symbol, why five figures should not be used in the main number, if thought desirable, or why, indeed, the additions to the decimal main numbers should not run on to 100 or even 1000 places. But it seems extremely unlikely that, even in the very largest

universal library, such a profuse numbering power would ever be required. But if so, the numbers would assume the following proportions :—

TWO FIGURE ADDITIONS.	THREE FIGURE ADDITIONS.
K951	K951
K95100	K951000
K95101	K951001
K95102	K951002
K952	K952
K95200	K952000
K95299	K952999
K953	K953

In all cases added figures must be used without the decimal point [K95100], as the point is used for distinguishing the categorical numbers. An interleaved copy of the classification is necessary in cases where additions are made, as new subjects should be written both in the Tables and Index.

10. Subjects which are not provided with a special number can either be placed under the nearest general head which will contain them, or they can have new places assigned by means of the intercalated numbers, as shown above.—It is, of course, absolutely impossible to make places for every subject which has existed, or still exists, to originate books, and it follows that some kind of inclusive head must be used instead. For example, take a French department, an English county, or a Russian government from the tables, and it will be found that hundreds of places are omitted. Numbers have only been given to capitals, county towns, cathedral cities, and in the United Kingdom to county and municipal boroughs, and in Scotland to Royal burghs. Beyond these there are numerous towns, districts, parishes, villages and other areas of historical interest, which could not receive numbers without swelling the tables and index to an enormous extent. So it is with every science, art or department; many minor subdivisions have been omitted. Take the case of U760 Hertfordshire, for example. Places are found for the county, the county town, Hemel Hempstead, and the cathedral town of St. Albans. But Bishop's Stortford, Hatfield, Ware, Hitchin, Watford, Hoddesdon, Knebworth, Rickmansworth, Berkhampstead, Stevenage, Cheshunt, and many other places are omitted, notwithstanding the literature which exists about some of them. What must be done in cases like this is to **number the book with the county number, and distinguish it from the general county books by adding the mark .02,** to indicate that it is subject to re-arrangement. Hatfield thus becomes U760.02. Another plan is to interpolate fresh numbers, as shown in Section 48, in which case Hatfield might be U7625. As regards very large local collections, it is best to use the marks provided in Section 48. All other classes must be treated in a similar manner.

11. The Categorical Table.—In the absence of a more expressive portmanteau word, "categorical" is used to denote a table of forms, phases, standpoints, qualifications, etc., which apply more or less to every subject or subdivision of a subject. It was thought unwise to load the Classification Tables themselves with repetitions of such categories, or

to provide numbers for the same forms and phases over and over again in a manner like the following :—

U900	London	
U901	—	Societies
U902	—	Periodicals
U903	—	Bibliography
U904	London, North of Thames	
U905	—	Societies
U906	—	Periodicals
U907	—	Bibliography
U908	—	History

and so on.

The effect of this would have been to extend the tables to at least one million places, without any advantage. It was therefore determined to relegate the whole of those form and other qualifications to a separate table, and to use its numbers for the subdivision of any topic as required. A complete list of such qualifying factors was therefore drawn up and separately indexed, and each category or subdivisional word was numbered after a point, so that a distinction should be made between any main number, original or additional, and the number which qualified it. Thus London in General, as a subject, preserves its own letter and number—U900, and it is subdivided by means of the categorical numbers in this manner :—

U900	London, General	
U900.1	—	Bibliography
U900.2	—	Dictionaries
U900.6	—	Societies
U900.7	—	Periodicals
U900.8	—	Collections
U900.10	—	History

Applied to a subject like Botany, the following subdivisions are obtained :—

E100	Botany, General	
E100.1	—	Bibliography
E100.2	—	Dictionaries
E100.3	—	Systematic Text-books
E100.4	—	Popular Text-books
E100.5	—	Philosophy and Theories
E100.6	—	Societies
E100.7	—	Periodicals
E100.10	—	History
E100.32	—	Archæology
E100.56	—	Exhibitions
E100.57	—	Museums
E100.59	—	Pictorial Side
E100.66	—	Methods of Teaching
E100.70	—	Methods of Study
E100.71	—	Schools
E100.89	—	Classification

Etc., etc.

Similarly, when applied to a subdivision of Botany, the same method is adopted of adding numbers from the Categorical Tables, as :—

E427	Orchids,	General
E427.1	—	Bibliography
E427.3	—	Text-books, Systematic
E427.4	—	— Popular
E427.6	—	Societies
E427.7	—	Periodicals
E427.10	—	History
E427.56	—	Exhibitions

Whatever subject or sub-division may be divided up in this way, the result is always the same, .1 is always Bibliography, .10 always History, and .89 always Classification, and when any number comes after a point, it is clearly a sub-divisional one, taken from the arbitrary Categorical Tables. A large number of the items in these Tables will not apply all round, and in the case of forms, standpoints and other categories affecting Biology, Churches, Languages, etc., it will be found that many names are introduced which will only apply to such subjects. For instance, in the case of a collection of books on the English or any other language, the subdivision would be effected by means of the Categorical Tables, as follows :—

M523	English	(Current) Language, General.
M523.1	—	Bibliography
M523.2	—	Dictionaries (subjects, not words)
M523.10	—	History
M523.873	—	Abbreviations
M523.875	—	Pronunciation
M523.877	—	Grammar
M523.897	—	Lexicons (Dictionaries), Words
M523.900	—	Dialects
	Etc.	

Other examples will be given when the application of the Classification is explained class by class, so that it is needless to multiply cases here. Enough has been described to make it clear how this separate table of categories can be applied to the subjects of the main classification.

12. Application of the System: General.—The fundamental idea of this scheme of Classification is that of assembling everything relating to a topic at *one* constant or unmistakeable place. As already explained, this is effected by providing a certain order of classes, in logical order, with divisions and subdivisions; means of intercalating new subjects; and a method of subdividing subjects into forms and other categories by means of a separate table of numbers.

All through this scheme an effort has been made to place each subject as near as possible to the science on which it is based. Where a subject assumes great complexity because of the number of sciences which enter into it, an endeavour has been made to place it in juxtaposition to the predominant science on which it is chiefly based. Agriculture is, therefore, put after Botany and Zoology; the mechanical side of the subject being considered subordinate. There are other cases of an apparent divorce

between allied topics, but many of the most closely related subjects are connected by means of cross-references, so that a certain amount of inter-relationship is shown.

Practical use has been considered all through the scheme, and it has been sought to obtain this by dispensing with conventions, distinctions and groupings, which are arbitrary rather than scientific. Classes like Literature, Useful Arts, Fine Arts, Extractive Arts, Mechanic Arts, etc., are examples of arbitrary or standpoint groupings which have been avoided, and as far as possible, unreal distinctions, such as those between Architecture and Building, Costume and Dress, Numismatics and Currency, have been ignored. The tendency in many classification schemes is to consider the archæology of a subject as a new science, and thus it has become a convention in many quarters that knowledge must be regulated by museum standards. It is this convention more than anything else which is responsible for the current belief that there can be no relationship between old coins and new; armour and the art of war; gems and mineralogy; harpsichords and music, and so on, *ad infinitum*. The collector has, by persistent work in special grooves, succeeded in establishing the idea that mere separation in time is sufficient to destroy any close relationship between identical things. It will be found that any kind of sentimental regard for conventional grouping is given but a small place in this scheme, not only because it is unscientific, but necessity makes it imperative in a classification, that only one place shall exist for one subject. With these remarks on " .5 theory," the consideration of some general applications of this particular scheme may be entered upon.

13. Composite Books or Subjects.—Books on more than one subject are to be placed at that first named on the title-page, unless it is ascertained that the predominant place is occupied by another subject. In many cases special numbers are provided for composite books on subjects like Electricity and Magnetism, Orkney and Shetland, and so forth, but it was not possible to find places for the many possible combinations of subjects.

Composite books should be marked in such a manner as to indicate clearly that they are on more than one subject. For example, a book entitled *Heat and Sound* might be marked C200 + 300, and one on Logic and Rhetoric A300 + M170. The most convenient place for such composites would be at the end of the subject, and, of course, the catalogue would have to indicate the existence of the second or third subjects. It is not advisable to go beyond combinations of three in marking. Should a book treat of three or more subjects in the same class, it is best to place it at the general head; as, for example, a book on *Light, Sound and Heat* at Physics. Occasionally books are met with which, without being encyclopædic, nevertheless treat of three, four or more remotely related subjects. In such cases it is best to classify them according to the predominant subject matter.

14. Locality *versus* **Subject.**—This is one of the most difficult problems connected with classification, because it is just as easy and useful to give a subject its subject-number and subdivide by national numbers, as to give it a place-number and divide by the subjects. The difficulty is more especially prominent in such subjects as local archæology, architecture,

ecclesiology, flora, fauna, etc., and the temptation to select locality in preference to real subject-matter is often irresistible. A *History of York Minster* may be put under Cathedrals, Architecture or York, and doubtless other heads in any classification, and the question which must decide its ultimate placing is "Where will it be most constantly useful?" The majority of persons, other than specialists, would say York, and undoubtedly the local attraction seems enormous in this particular case. Grant's *Edinburgh Castle* might be numbered B972V331 at "Fortifications," subdivision "Castles," where it would be lost to the person interested in Edinburgh and absolutely useless to the soldier. The majority of classifiers would doubtless number it V331.225; and it is difficult to understand how works on castles, abbeys, churches, streets, etc., can be appropriately or conveniently classed on their purely physical or art sides, when their whole scope and interest is historical, archæological and local in nine cases out of ten. This holds good in the case of nearly all local monuments, landmarks and buildings, and for that reason it is one of the rules of this classification scheme that **local numbers should be given to the following subjects:—**

Local Ecclesiastical Buildings, Abbeys, etc.
— Churches and Chapels
— Cathedrals
— Palaces
— Mansions
— Castles
— Streets
— Monuments (other than Statues)

This rule applies in every case, and includes architectural books, pure and simple, diocesan or other histories, and generally any aspect or phase of the subject. In several cases throughout this scheme, as at London and Paris, this local treatment has been adopted in the tables by assigning special numbers to local buildings, etc., of great renown.

In all other cases the subject number must be used with local or other qualifications as may be necessary, thus:—

The Flora of Surrey	E172U830
The Geology of Arran	D398V222
Freemasonry in Russia	L185So
Cathedrals of the World	J851
— of France	J851Ro

It will be seen that castles, cathedrals, etc., *in general*, are placed with the subject instead of at locality, and for this variation it is only necessary to point out that local interest evaporates in proportion to anything becoming universal, and that the most constantly useful place for general works on buildings will be at the subjects with which they are associated. This might not seem to apply to works like local floras and so forth, but, as a matter of fact, books on local botany, geology, zoology, etc., are really text-books for a whole science, and have no interest for merely local purposes. From these rules special local collections must, of course, be excepted, and in cases where it is necessary, the local number,

subdivided by the categorical tables, and such other extra numbers as may be added, will be found to answer every purpose. *See* Section 48.

The limitation adopted for local books will be found quite workable and practical in actual use, and it might be pointed out that in all necessary cases the catalogue will index under any heading what must be omitted by the classification. It is hardly necessary to point out that most subjects have a national or local character, and that a classification on such lines is quite practicable, though it would be almost useless, save as regards such subjects as are especially assigned to locality above.

15. Application of the System by Classes.—In using this scheme of classification one rule must always be observed in applying numbers to books, and that is, **the number of a subject in the Index is the number to be given to a book whose subject has been definitely ascertained.** Whatever categorical or other numbers may afterwards be applied, the *one* place number is the Index number, unless, on turning it up, there appears to be a comprehensive entry including many numbers, in which case the Tables themselves must be consulted. Thus, the number of Coffee in the Index is E917, and at this place must be collected *everything* relating to coffee, regardless of standpoint, form or other qualification. E917 may be qualified in the usual way by means of the Categorical Tables, but it must not be put under such headings as Tropical Agriculture, Beverages, Crops, Foods, Drugs, Ethics, Bibliography, Customs, or any other general head. In cases where inclusive numbers are given in the index, like Crops, 1013-31, it is necessary to consult the entry in the Classification Tables in order to ascertain the range of the subject.

With these general remarks, the application of the system to individual classes may now be considered.

RULES FOR SPECIAL CLASSES.

16. A Generalia.—Numbers A000 to A070 are for universal works only, general cyclopædias, periodicals, museums, collections, etc. A003 is a place for uniformly edited and bound editions of the collected works of authors like Goethe, Scott, Carlyle, De Quincey, Hugo, Voltaire and other miscellaneous writers, whose works it may be undesirable to distribute. A002 is intended for libraries of general writers, and A001 for all kinds of general collections other than those on special subjects. *See also* Section 46.

It must always be remembered that every division in this classification is a general one to begin with, and that special applications must go with the specific subject, to which the categorical number can be added. Thus:—

A320 is Classification in general; but Zoological Classification would be F000.89; Botanical Classification, E100.89; Geological Classification, D300.89; Historical Classification O000.89, and so on.

A600 and onwards are the numbers for the pictorial side of subjects in general, but illustrations of specific subjects must go with the subject and have the categorical number .59 added. A series of pictures, without text, or merely titles, entitled "Historical Cartoons," of a general nature, would be numbered O000.59, but if it dealt only with the history of France (R000.59) or Normandy (R230.59), or Rouen (R234.59), then it would

be numbered as shown. Collections of the works of individual painters, like a "Wilkie Gallery" or "Rubens' Pantheon," would be numbered A680, and be subdivided by the numbers of the Biographical Table. When the literary matter connected with the works of an artist is greatly in excess of the pictorial, it is best in many cases to transfer the work to Biography.

It is always extremely difficult under ordinary circumstances to number and distinguish clearly works like the following:—

A639 + 616	Landscape	Painting	in Water Colours
A639 + 615	—	—	in Oil Colours
A639 + 617	—	—	in Monochrome
A639 + 626	—	Drawing	in Pastels
A639 + 624	—	—	in Chalk
A638 + 627	Sketching from Nature in Pen and Ink		
A642 + 616	Flower Painting in Water Colours		
A634 + 615	Portrait Drawing in Oils		

The numbers attached to each entry above will show how this should be done. Without multiplying numbers by providing separate places for every possible combination, it is difficult to make the various methods and mediums clear. A950 is a place for collecting Scientific Surveys and Travels, if it is considered unsuitable to place them in the Historical and Geographical division. The "Challenger" reports and papers would go here, and works of a similar character, but it is doubtful if more local works of a scientific nature should also go here. Much will depend upon their general trend. Some books of scientific travel are a compound of geology, meteorology, philology, ethnology, botany, zoology, adventure, history, topography and sociology, which are most useful when placed at their local numbers. Others are largely description and sport, while some are restricted to the study of particular aspects of animal or vegetable life. The proper place for such books must be decided by the classifier, but as a general rule, all purely scientific surveys of a general kind should go at A950, while all others should get local numbers.

17. B-C-D Physical Science.—B110 Machinery, Implements, etc., in general, are assembled here, but the special instruments or apparatus connected with specific arts and sciences must be placed with the arts or sciences, and qualified by the categorical number .167, unless a special number has been assigned, in which case the index will show it. For example, C152 is the place specially reserved for the Telescope, but a Theodolite, without a numbered place, would have to be numbered as D020.167 to indicate its position as an instrument used in surveying. There is no special number assigned for Library or Railway Indicators, although there is a place for Indicators in general (B647), consequently they would require to be numbered M962.167 and B523.167 respectively. The numbers from B110 to B154 are for Machinery in general, and not for special engines, which have special places. B112 Stationary Engines may be driven by steam, electricity, wind, water, gas, oil or other power, and it would, therefore, be incorrect to put a book on the Stationary *Steam* Engine here. The most constant place would be C280, where a number is provided for the purpose. But works on stationary engines

in general must have a place, as well as the different kinds of engines, and for such books this general place has been provided. On the other hand, the best constant place for an electric lift would probably be B120, as in this case the motive power is less important than the purpose of the mechanism.

18. Architecture.—Books on buildings for specific purposes, should be placed at the subject, with the distinguishing categorical number .185. This rule applies to every kind of special building, and it will be seen that the numbers B300 to B490 are reserved for general works on Architecture, on construction, details, history, etc.

19. Music.—In cases of very large collections, it is advisable to group and subdivide instruments and forms, by combinations of numbers, as in the Graphic Arts, keeping in mind the question of what constitutes the most constant place. For practical purposes it is probably most useful to number by instrument and divide by form. At C475 Gavottes, a place is provided for the literature and general works on the Gavotte as a dance, but after this need is fulfilled, it seems best to put music in this form at the instruments for which it is written :—

C612 + 475	Gavottes for	Violoncello *not* C475 + 612
C626 + 475	—	Harp *not* C475 + 626
C647 + 475	—	Pianoforte *not* C475 + 647
C721 + 475	—	American Organ *not* C475 + 721
C758 + 475	—	Military Band *not* C475 + 758

There is a practical convenience about this course, which arises from the fact that arrangement by instrument is the almost universal practice of music publishers. In arranging duets, always use the number of the solo instrument, as C687 + 647 "Duets for Flute and Pianoforte," which at once distinguishes the character of the piece. Combinations of more than two instruments must be arranged at C767, etc., qualified by form numbers.

20. Poetry and Music.—In cases of collections of songs, hymns, etc., which are provided with the words and tunes only, without accompaniments or other specially musical additions, number at N1 (Poetry). In all other cases, however full the poetical text may be, if accompaniments are given, number as Music, viz. :—

N102V0 Chambers. Songs of Scotland prior to Burns. (Tunes only)
N102U3 Kidson. Traditional Tunes. (Tunes only)

But

C591V0 Graham. Songs of Scotland . . . with pianoforte accompaniments.

Operas, oratorios, etc., must be treated as Music, and numbered accordingly. References or entries relating to poets and librettists must be furnished in catalogues.

Monographs and books on **Rocks, Minerals, Chemical Compounds,** etc., not represented in the index should receive the number of the nearest group to which they belong.

21. E–I Biological Science.—Special aspects of plant and animal life can be shown either by combining the numbers of general biology with the subject number, *i.e.*, F237E026 *Respiration of the Cuttle Fish*

or by using the categorical numbers—F237.390; or E392.370 *Evolution of the Onion*, which is usually the best way. In most cases the additional numbers of the Categorical Tables will be found sufficient, but in cases where it fails, recourse must be had to combination. The extraordinary number of processes, functions, organs, etc., connected with Biology—vegetable, animal and human—makes such a plan necessary, as it is impossible, without greatly enlarging the General and Categorical Tables, to provide separate places for everything. Places have been found for all the chief departments of human biology, as distinguished from Comparative Biology, but in cases where it is necessary, combination of numbers must be resorted to for minute classification.

22. J-K Philosophy and Religion.—The distinction between general or Comparative Theology—J400, etc., and K320 Christian Theology—must be carefully noted, otherwise many mistakes will be made in confusing the general idea of a God, or supreme power, Sin, Punishments, etc., with the Christian idea. Here again, provision has been made in the Categorical Tables for subdividing, say, Buddhistic Eschatology from Christian Eschatology. The instructions in the tables for keeping general works on Church Doctrine—J600, and Church Government J800—separate from works on the doctrine, government or institutions of single churches or beliefs must also be carefully noted. The difference is best shown by examples :—

J 630	Hones.	Liturgies of the World (General)
K750.685	—	Liturgy of the Church of England (National Ch.)
K740.685	—	Prayer-book of the Unitarian Chapel at Highgate
U916		(Local)

The effect of this is to place all general liturgies, hymnals, etc., at the general heading, while keeping the prayer-books, etc., of special churches with the other matter relating to such churches, which, in a vast majority of cases, would be the most constant place. It is possible, by using these church plus categorical numbers, to disentangle the vast literature of religion, which in some libraries is hidden away under one number! The most minute distinctions can be shown without the use of an immense symbol, and due respect is paid to the general and special aspects of every department of Ecclesiastical Doctrine and Government.

23. M Language, Literature, Bibliography.—Each separate language must be subdivided as regards forms and subjects—grammar, dictionaries, pronunciation, etc.—by the numbers from the Categorical Tables. **Dictionaries** of more than one language are to be arranged under the language which is not that of the nationality of the library, *i.e.*, Greek-English, French-English, English-German dictionaries would, in an English library, be numbered at M457.897 Greek, M435.897 French, and M564.897 German respectively. In a German library the same local treatment would occur. In the case of German-Latin, French-Greek, Italian-Russian and other combinations, arrange in an English library under the name of the language which comes first in alphabetical order.

Languages and Literatures go together. In many cases separate numbers are provided. In others—comparatively unliterary languages—one number is given at which both language and literary history can

be assembled. They can, however, be divided by means of the Categorical Tables, thus :—

M227.867 Numidian Language
M227.915 — Literary History

24. O–W History and Geography.—This heading includes civil, church, military, and social history, and excepting in the case of individual churches, all national ecclesiastical histories are assembled at the country to which they relate :—

R000.16 Ecclesiastical History of France

Historical events which are the subject of separate books are, unless a special place is provided, to be placed in the reign of the monarch who was in power when they occurred, *e.g.* :—

V551 Gunpowder Plot

These regnal numbers thus become the place of assembly for all the royal biographies, state papers (general), histories and special monographs on any event of an historical nature which occurred during the reign. It is sometimes difficult to find exact places for some events, but generally, if they are spread over two or more reigns, it is best to place them in the reign when they commenced. To secure minute subdivisions in a reign the Chronological Tables can be used—V551fz. Battles are to be numbered in the countries or towns where they were fought, unless general battles, which go in O006, or battles of a national kind which cannot be closely localised, like " Battles of Belgium "—T200.20.

25. Special Local Collections, when very large, can, if necessary, be removed from the main classification and re-arranged at the unappropriated class letter **Y,** under such special divisions as may be necessary, or those printed in Section 48.

26. X Biography (including Correspondence and Criticism).—At this class are collected all general biographies and collective biographies of particular groups. Also the biographies of individuals, in an alphabet of biographical names, to be fixed by the special Combination Tables at X300, etc. When it is thought better to distribute the individual biography at subjects, a very inconvenient and frequently impossible task, the subject of the biography must get the topic number from the Classification Tables, plus the categorical number for Biography :—

C400.41 Thayer's Beethoven
A676.41 Thornbury's Life of J. M. W. Turner

The main difficulty in the way of distributing Biography throughout subjects is the impossibility, in numerous cases, of determining in which class a man is most known. Buckingham, who

" Was chemist, fiddler, statesman and buffoon,"

is just the type of man who cannot be classified, and there are thousands like him. Apart from this, there are practical difficulties in the way so far as libraries are concerned, and unless for special purposes, biography should invariably be kept by itself. In collective Biography, topic is to be considered paramount to race, nationality or sex.

27. Criticism, Ana, Biographical Collaterals.—Should criticism and commentary go with the life of the person who provokes it, or with the

works or deeds which he accomplishes? This is a difficult problem, as it is hard to determine, for example, what is the most constant place for criticism on Shakespeare and his works, in whole or in part. For convenience sake it is thought best in this classification to **gather all general criticism and commentary at the Biographical number, but to place commentaries and elucidations of single works with such works.**

Examples:—

X7860 Gervinus. Commentaries on Shakespeare
X7860 Hudson. Shakespeare, his life, art and character
$\frac{N250.919}{7860}$ Robertson. Titus Andronicus
X7860 Martin. Shakespeare's Female characters
X7860 Ellacombe. Plant Lore of Shakespeare
X7860 Hazlitt. Characters of Shakespeare's Plays
$\frac{N250.919}{7860}$ Halliwell-Phillipps. Memoranda on *Love's labour lost*
See also Section 47 for Mr. Dent's proposed arrangement of Shakespeare

The effect of such an arrangement is to assemble every general or personal biography, study, criticism, or the ana of a celebrated individual at one well-defined and easily found place. On the other hand, studies of great works, like the numerous expositions of Dante's *Inferno*, would naturally go with the poem, while the biographies of Dante would take the biographical number.

28. Biographical Numbers for subdividing and maintaining Alphabetical order (X300, etc.). This table is to be used exclusively for numbering authors in any subject where necessary, so as to distinguish one from another. In large libraries this will be found necessary in many cases, both under subjects in catalogues and elsewhere. But in individual biography, fiction, poetry and other classes it will be found useful in providing a fixed place for most alphabetical combinations, and assembling similar names at one place. With regard to the distinction of authors under subject-heading, the following examples will show clearly how the numbers are applied. As indicated by the table itself, numbers are substituted for every arrangement of two or three letters of the alphabet, and by combining these when necessary any alphabetical combination can be numerically expressed.

E100.3 Botany: Systematic Text-books.

Biog. No.
3262 Baillon. Natural history of Plants
3306 Bentley. Botany
3408 Bower. Practical Instruction in Botany

Written on cards and books $\frac{E100.3}{3262}$ $\frac{E100.3}{3408}$ etc.

For registering purposes Bower would be numbered $\frac{E100.3}{3408}$ and his book would be thus distinguished from all other books under the same head.

As the subject of author and other numbers is discussed in full later on, it is not necessary to allude further to it here. *See also* at X945.

29. Notation—the Numbering of Books.—In most libraries which use exact classification, it is customary to apply numbers to books so as to indicate their class, authorship, and sometimes title, edition and copy. Numerous plans for effecting this numbering so as to differentiate one book from another have been devised, and the principal schemes are here briefly outlined.

30. Author Numbers and Symbols.—Perhaps the most sensible and straightforward way to distinguish books from each other is to rely entirely upon the class number or symbol, plus the lettering on the books themselves. For whatever purpose required it seems much simpler to arrange books on shelves, in charging systems, in catalogues, or anywhere else, in a plain and easy sequence of author's names in alphabetical order, under each division or subdivision of a class or subject, thus :—

F000.3 Zoology : Systematic Text-books.

Claus (C.) Elementary text-book on zoology
Edwards (H. M.) Manual of zoology
Hertwig (R.) General principles of zoology
Parker (T. J.) and W. A. Haswell. Text-book of zoology
Nicholson (H. A.) Manual of zoology
Sedgwick (A.) Student's text-book of zoology

Practically speaking, it is just as easy for anyone to find F000.3 Edwards, as to find $\frac{\text{F000.3}}{4077}$, F000.3E31 or any other symbol, and as regards library records, where cards, books, or other registers bear full particulars, it seems a refinement of elaboration to *add* to a book's own description of itself.

31. Failing acceptance of this obvious and commonsense method, the **second** in ease of application is probably the use of the accession numbers, which most libraries apply to books in addition to any class or other number. These accession numbers are generally arranged in a progressive series, so that no two books can possibly be numbered alike. When such numbers are used they can be applied in two ways :—

F000.3 Zoology : Systematic Text-books.

5964 Claus (C.) Elementary text-book of zoology
13764 Hertwig (R.) General principles of zoology

or in dictionary catalogues—

Zoology, Systematic Text-books.

F5964 Claus (C.) Elementary text-book of zoology
F13764 Hertwig (R.) General principles of zoology

The charging number would thus become, in the case of Claus, $\frac{\text{F000.3}}{5964}$ or simply F5964.

32. A **third** method is that already mentioned in Section 26 of this

Introduction, being the addition of the Biographical numbers (X300–975) to the class numbers, thus :—

F000.3 Zoology : Systematic Text-books.

$\frac{\text{F000.3}}{3630}$ Claus (C.) Elementary text-book

$\frac{\text{F000.3}}{4866}$ Hertwig (R.) General principles

$\frac{\text{F000.3}}{6670}$ Nicholson (H. A.) Manual

33. A **fourth** plan is to use the symbols devised by the late Mr. C. A. Cutter, which have been published in tabular form, and are entitled the "Cutter Author Marks." In this table all the most ordinary names, to the number of over 12,000 are numbered letter by letter like the following examples :—

Abbott—Ab2	Doyle—D77
Acland—Ac6	Gibson—G36
Alexander—A37	Hamerton—H19
Augsburg—A92	Tomkins—T59
Beard—B34	Warren—W24

Of course, as this table is selective, there are thousands of alphabetical combinations which it can only roughly hint at ; but it serves a useful purpose in approximately placing authors' names. As the Biographical Table (X300, etc.), forming part of this Classification, gives nearly half a million places for combinations of two numbers (six figures) only, it will be realised that the Cutter marks are necessarily restricted. In practical application the Cutter marks are used as follows :—

F000.3A37 F000.3T59 F000.3W24, etc.

34. A **fifth** method, restricted to 100 places, has been devised by Mr. Merrill, of the Newberry Library, Chicago, and as it may be found useful for subdivisions in small libraries, it is here given in full with the author's kind permission :—

MERRILL ALPHABETING NUMBERS.

01	A	16	Chan	31	Forr	46	K
02	Agre	17	Ci	32	G	47	L
03	Als	18	Clo	33	Gay	48	Lang
04	Ap	19	Cond	34	Gill	49	Law
05	Ash	20	Crom	35	Goe	50	Leo
06	B	21	D	36	Got	51	Lit

Merrill Alphabeting Numbers—*continued.*

61	N	71	Pow	81	Sevi	91	Ull
62	Nev	72	Q	82	Simons	92	Upt
63	Nol	73	R	83	Soo	93	V
64	O	74	Rey	84	Steb	94	Ven
65	P	75	Robi	85	Stratt	95	W
66	Parkm	76	Row	86	T	96	Wats
67	Pek	77	S	87	Thau	97	Wha
68	Pfi	78	Sanch	88	To	98	Wit
69	Pif	79	Schar	89	Trum	99	X—Z
70	Po	80	Schwar	90	U		

These numbers would be used thus :—

$\frac{\text{F000.3}}{25}$ Edwards (H. M.) Manual of Zoology

35. A **sixth** method consists in the use of the first three letters of the author's name, added to the class number, and in most cases this is a sufficient mark for all ordinary purposes, though it is sometimes necessary to extend the number of letters used. In actual practice it appears thus :—

F000.3 Cla. Claus (C.)
F000.3 Edw. Edwards
F000.3 Par. Parker

Two methods of applying these letters are described in the *Library World*, Vol. 3, 1900–1, by Messrs. Jast and Anderson respectively.

36. Title or Book Numbers.—It is not often, save in Fiction, Poetry and other very large alphabetical classes, that titles require to be distinguished but even for this various methods have been devised. A plan sometimes adopted is to use the ordinary alphabetical name tables, Cutter, etc., and mark the first word of a title ; in other cases the separate works are simply numbered 1, 2, 3, etc., in any order. Thus if a library has a set of Mrs. Oliphant's novels, one gets the following collection of first words :—

Plain No.	Composite No.			Cutter Mark.	Brown Mark.
1	3016	Oliphant,	Madam	M23	633
2	3019	—	Madonna	M23	633
3	302	—	Maelstrom	M24	633
4	3031	—	Magdalen	M24	6330
5	306	—	Margaret	M38	6335
6	3010	—	Marion	M38	6335
7	3017	—	Marriage	M41	6335
8	3018	—	Mary	M43	6335
9	3032	—	Massacre	M45	6336

The translation of the " Composite Number " above is that Oliphant is the third author in letter O, and the numbers following indicate the works in order of accession. It is a method of distinguishing authors and books, and requires special records of authors' names and their works, otherwise numbers may easily be repeated. Neither of the numerical systems are of use save for the libraries in which they are employed, because the numbers mean nothing, and are mere arbitrary symbols which are not generally standardised. The Cutter and Brown marks are taken from

standard tables, and have, therefore, universal application. But both are clumsy, and, as has already been stated, not absolutely necessary.

37. Copy Numbers.—Sometimes a number of copies of the same work are kept, and when this is so, they may be distinguished by having a number coming after a characteristic mark, as $\frac{6754}{3665-1}$ $\frac{6754}{3665-2}$. In numerical arrangements there is no need for any such marking.

38. Chronological Arrangement.—In many scientific libraries it is deemed advisable to adopt a chronological arrangement on the shelves and even in catalogues, in order to assemble the latest works on a subject at one place. There is a certain amount of convenience in this, and several plans have been devised for marking books so as to indicate what order is intended. The simplest scheme, that of Mr. W. S. Biscoe,* is liable to be mistaken for Cutter author marks, as the symbols are identical, but where Cutter's tables are not used, they will be found clear enough.

39. Biscoe Date Table.—

A—Before Christ	J—1830 to 1839
B—0 to 999	K—1840 to 1849
C—1000 to 1499	L—1850 to 1859
D—1500 to 1599	M—1860 to 1869
E—1600 to 1699	N—1870 to 1879
F—1700 to 1799	O—1880 to 1889
G—1800 to 1809	P—1890 to 1899
H—1810 to 1819	Q—1900 to 1909
I—1820 10 1829	R—1910 to 1919

Undated books are marked with the letter of the supposed date—M indicating a book published any time between 1860 and 1869. All other books are numbered with the letter and the year number, ignoring centuries, as in this example in the Dewey Notation :—

580.2Q05 Balfour. Manual of Botany. 1905
614.132P99 Return on Infant Mortality. 1899

40. Extended Date Table.—To avoid the use of both letters and figures in expressing dates, and also to shorten the symbols, the following table, dealing with the period from the invention of printing, has been prepared. For marking MSS. or for any other purposes, a similar table can be constructed and distinguished from this one by the use of capital letters. These symbols can be used for closely distinguishing events in the regnal years of monarchs.

By using this table the marks would appear thus :—

E100.3rn Balfour. Manual of Botany. 1905

and would not conflict with the symbols of this or any other system. A one-letter table can be devised by using varieties of type, as with the hall-marking of gold and silver plate, but of course, it would be unsuitable for manuscript purposes.

41. Other Marks and Indications. Juvenile Books.—When thought necessary to indicate in a mixed alphabetical catalogue, or for any other purposes, when a book is suitable for children, a "j,"= juvenile or "c,"= children, can be placed in front of the class letter, thus —

jE100.4 or cE100.4

and if further thought necessary to distinguish books specially suitable for girls or boys, "g,"= girls, or "b,"= boys, can be substituted, reserving the "j" or "c" for works of general interest. But in these days of separate catalogues and libraries, this is a refinement which seems hardly necessary.

42. Controversial Subjects.—In some libraries, and in catalogues of various kinds, it may be necessary to indicate the books written for and against a particular view or subject. The *pros* and *cons* of Vegetarianism, Slavery, Roman Catholicism, Temperance, and hundreds of other subjects may require indication in large libraries, and a simple way of doing so, if the books cannot be actually separated on shelves or in catalogues, is to mark the Class number with a sign which shall clearly distinguish the standpoint. An asterisk, for example, could indicate the pro, or favourable view, and a double asterisk the anti or unfavourable view, thus :—

**I714 Johnston. Is smoking injurious ?
*I714 Russell. The smoking habit

or by using the letters "f,"= for and "a,"= against—

aI714 Johnston. Is smoking injurious ?
fI714 Russell. The smoking habit

In cases where catalogues are properly annotated, no marking will be necessary.

43. Book Sizes.—The question of indicating book sizes is one for cataloguing chiefly, and does not enter into classification save as regards

the physical placing of books. It does not affect the class or subject numbers, and it is now the general practice to make size notation a part of the catalogue entry. In libraries strictly classified it is best to separate the folio and quarto books from the octavoes, and to store them in specially made cases. Dummies or blanks can be inserted in the spaces which should be occupied by folios and quartos, bearing a reference to the place where they can be found.* In the catalogue the entry will show if a book is f° or 4°, or F or Q, by printing these symbols as part of the entry.

44. The Index.—The Index registers every subject word which occurs in the Classification Tables and many synonyms. It also directs to some unnumbered subjects, such as historical events in the reigns of different monarchs, and other matters which are included in divisional or main headings. It has not been thought necessary to repeat under national heads the various sciences, arts and historical categories which could be assembled there, nor at subject-words has it been deemed proper to show the national divisions of such topics. Biographical names are also omitted, and also all references to unnumbered geographical or historical areas. **The Index number is the one to be applied in the first instance, when a subject is definitely ascertained, and the subdivisions must be taken from the Categorical Tables.** From this rule there can be no departure by strict users of the classification. On the other hand, the specialist or standpoint classifier who prefers to assemble all his material at a particular place, can do so by using the abstract place, and qualifying it by means of the Categorical Table or numbers from the Classification itself. Thus, a bibliographer can use the mark M760 and then proceed to subdivide it thus :—

M760.0	Bibliography,	General
M760.1	—	of Bibliography
M760.2	—	of Encyclopædias
M760.10	—	History
M760.40	—	Maps
M760.92	—	Arithmetic
M760.570	—	Mountaineering
M760.963	—	Proverbs

etc., etc.

When he has exhausted these tables he can proceed to the National, Linguistic or Biographical Tables, as follows :—

M760T311	Bibliography	of Brussels
M760M590	—	Gipsy Language
M760X3132	—	Hans Christian Andersen

45. Aids to Classification.—It is absolutely necessary in applying this Scheme of Classification, either on a large or small scale, to make use of good reference books. It is difficult, sometimes, to say where a place is, what a name means, when an event occurred, or who a person was, and for that reason the following books should always be accessible.

1. A good Atlas, with a full reference index.
2. A good modern Gazetteer, general.

* See Brown's *Manual of Library Economy*, p. 152-3.

3. A good modern National Gazetteer (for the country in which the Library is).
4. Haydn's Dictionary of Dates, last edition.
5. Blair's or other full Chronological Tables.
6. Beatson's Book of Dignities (Haydn).
7. A good Biographical Dictionary.
8. A Dictionary of Scientific Terms.
9. Dictionaries of most languages.
10. Smith's Century Cyclopædia of Names. (Useful for Vernacular forms).
11. Willis' Flowering Plants and Ferns.

APPENDICES.

46. Table for arranging an Author's Works.

Single works in chronological order :—

a Originals, including Manuscripts
b Reprints
c Translations in Foreign Languages
d Parodies
e Criticism, etc.

Each work to have all these divisions assembled with it in the order indicated.

Collected works in chronological order :—

f Author's editions.
g Editor's editions.
h Selections.
i Paraphrases and Condensed Versions.
j Dramatic Version of Works.
k Musical Settings of Works.
l The Pictorial side (*Illustrations inspired by Works*).
m Biography.
n Correspondence and Autographs (excluding MS. of works).
o Criticism and Ana, general.
p Portraits, Busts, Monuments.
q Periodicals connected with the Author.
r Societies connected with the Author.
s Exhibitions, Festivals, etc.
t Concordances, Aids and Guides.
u Bibliography.

In applying this table to a special author, the letters can be added to the biographical numbers, and the books collected at A003 Collected Works of individual authors. The effect would be as follows :—

A003/3462a Burns (R.) Poems chiefly in the Scottish dialect. 1786

A003/3462k — The Jolly Beggars. Cantata, by Sir H. R. Bishop

A003/3462u — Bibliography, by J. Gibson.

47. Table for arranging the works of a particular Author, suggested by Mr. Robert K. Dent, Borough Librarian, Aston Manor.

SHAKESPEAREANA:

RATIONAL SCHEME OF CLASSIFICATION.

The Man.

1. General Biographies.
   - Brief Biographies in books.
   - Original documents, contemporary or 17th century biographical references (e.g. Dowdall's "Traditionary Anecdotes," etc.)
   - Allusion-books, to 1700.
2. Personalia Parentage and genealogy.
   - Shakespeare's earlier Stratford life.
   - Was he a deerstealer ?
   - Was he a schoolmaster ?
   - Was he a butcher ?
   - Other conjectures as to early training.
   - Legends as to his early life: the crab-tree, etc.
   - Courtship and marriage.
3. Shakespeare in London.
   - His personal connection with the stage.
   - His London home.
   - Did he travel abroad ?
4. Shakespeare's later Stratford life.
   - His business enterprises.
   - His family.
   - His death.
   - His will.
5. Portraits and monuments: and works relating to the portraits.
6. Shakespeare's home.
   - Stratford-on-Avon generally.
   - The Birthplace.
   - Anne Hathaway's home.
   - New Place.
   - The church and the grave.
   - Shakespeare land.
7. Shakespearean jubilees and other celebrations.

His Works.

1. Original issues. (Separate plays and poems).

1a. Collected editions. (All before 1700).

2a. Separate plays (where specially edited or published complete. Not acted editions or adaptations).

2b. Editions of the Works, after 1700.

3. Anthologies, Concordances, and Indexes.
4. Sources, and other books used or adapted by Shakespeare.
5. General literary criticism.
   - Criticism of separate plays in detail.
6. Criticisms and Theories of the Sonnets.
7. Archæological illustrations of his writings.

8. Evidences in his writings of
   Bible knowledge.
   Legal knowledge.
   Sea Terms.
   Country life, etc., etc.
9. Variora and conjectural emendations.
10. Forgeries.
11. Bacon theory.

The Stage.

1. Acting editions, alterations, and adaptations of Shakespeare's plays.
2. Special works on the contemporary stage.
3. Lives of players: (a) Contemporaries; (b) Later players.
4. History of the stage.
5. Archæology and costumes.

Graphic Illustrations of Shakespeare.

1. Topographical Prints and Drawings.
2. Archæological illustrations (pictorial) of his writings.
3. Imaginative illustrations; portraits of his heroines, etc.

Shakespearean Music:

1. Traditional or early music (before 1700).
2. Operas, cantatas, incidental music, and modern settings of the Songs.

48. Table for arranging a County or other Area.—This table shows how a large number of items can be arranged in a local collection, and how provision should be made for towns and districts not provided for in the main tables. In order to obtain full representation of every area, it is necessary to turn up the county or department or whatever it may be and make out a complete list of parishes, independent towns or other administrative areas, and on that basis number the whole series. Of course, this is only necessary in the case of large collections of books and prints, and will not be necessary in one out of a hundred libraries, save as regards the collection relating to the town or district in which the library is placed. Two methods are shown of marking subjects, and where the numbers are taken from the Classification Tables, the arrangement may be assumed to have general application, but in the case of the table using the letter Y, the arrangement is intended for a large purely local collection. The area chosen is that of Edinburghshire, and it is clearly shown how the Categorical Table meets all ordinary needs. It is assumed, for the purpose of the Y arrangement, that everything is collected at Edinburghshire. In the other arrangement only the purely local matter, as defined at No. 14 of the Introduction, is included.

V336	Haddingtonshire	

In cases where the number of areas exceeds 100, it will be necessary to use a three instead of a two figure addition—W241000, etc., Y000, Y001, etc. Some may prefer to use an alphabetical order of place names instead of a geographical one, in which case Edinburghshire would arrange thus, Dalkeith coming out of its order :—

V330	Edinburghshire		Dalkeith. See V334
V3300	Borthwick	V3309	Duddingston
V3301	Carrington	V331	Edinburgh City

V333	Musselburgh	V335	Pentland Hills

In a great number of cases, particularly in the county divisions of the United Kingdom, the adoption of alphabetical order would lead to the shortening of symbols, but, of course, adjoining parishes would be separated.

49. Classification of Library Economy, Administration, and Office Papers, by L. S. Jast, Croydon Public Libraries.

The following scheme is an attempt to apply classification not only to the literature of Library Economy, but also to the various written records and papers bearing upon the administration of libraries, and processes of work. The scheme under Library Economy in the Expansive classification is stated to be applicable to administrative papers, as well as to the printed literature of the subject, but it is essentially for the latter purpose and only incidentally useful for the former ; it is also nothing like detailed enough to be of much service in administration. Mr. Madeley, librarian of the Warrington Public Library, in the *Library Association Record*, v. 6, pp. 367–387, presents a classification for office papers only. The present scheme differs from Mr. Madeley's in that while primarily a classification of office papers and library activities generally, it also covers the literature of Library Economy, and is far more detailed than any tables hitherto printed.

The object of the scheme is to provide a number for every kind of document, letter, record, process or group of processes in a public library, and to refer by a single reference to the place of storage of every kind of material. The arrangement and indexing of business papers is aimed at by all the various makers of different kinds of files now on the market, but even librarians, who have learned the value of the systematic arrangement of books, have, with few exceptions, not yet appreciated the fact that command over one's papers is not essentially a matter dependent upon any kind of filing system, but can only be obtained by means of a systematic and carefully designed subject-arrangement. The ensuing scheme will achieve its purpose with the most prehistoric filing system, but the easy consultation and manipulation of papers will be aided by a good method of filing. It may be laid down as a general principle that, for the most part, any system of filing which *binds* papers is not so good as one in which the papers are loose. The system which lends itself best to such a system of arrangement as that following is the Vertical system. Folders are marked with the number of the topic, and all loose papers are filed under their various numbers. Bound records, such as account books, stock books, etc., will, of course, be numbered on the back, and arranged on shelves.

Space will not permit a full description of the applications of the system to the practical work of the library, but a few brief notes are appended on the more important of these.

Use of other Class Numbers.—The note "subdivided like the main classification," as *e.g.*, 4296 Special reports to Committee, refers to this present Library Economy classification. But for the further division of any of these numbers to indicate form or geographical divisions, and in some cases subject, as *e.g.*, 19 Libraries on special subjects, the numbers of whatever classification is employed in the library may be used. In the case of the Subject classification these numbers are simply added to the Library Economy numbers, the fact that the Subject numbers begin with a letter serving to prevent any confusion between these numbers and possible subdivisions of the Library Economy classification. If, however, a pure number, such as the numbers of the Dewey Decimal system, is used, it should be put in brackets. Thus 0 being general works on Library Economy, 0 (02) will mark a manual of Library Economy, 02 being the Decimal form number for compends; so also 61222 being publishers' catalogues limited to a subject, 61222(59) will mark a catalogue of zoological works.

It will probably be best to use Cutter alphabetical numbers for geographical divisions, running country, district, or town in one alphabetical sequence. Thus :—

17 Municipal and free libraries
17C17 Cardiff
17C61 Cleveland (U.S.)
17C81 Cork
17C88 Croydon

Correspondence.—Correspondence should be treated like other material and arranged by subject. In the case of a public library most correspondence is far more valuable under subject than if arranged alphabetically or by date. For example, a library is running a course of lectures, all its correspondence dealing with that course will go in 244, and be kept together; all its quotations (other than books) will go in 514, its accepted quotations in 5145, and if wished, this material may be subdivided like the main classification, and all quotations for, let us say, shelving, 514381, will then arrange together; so again quotations for second-hand books will go in 6236, and here will gradually collect a mass of valuable memoranda, which in an ordinary way would not be worth keeping, merely because it would be lost in a mass of other material. Another advantage of the subject arrangement of letters is that a great deal of ephemeral material can be automatically weeded out, or destroyed at once, as it will usually be found that either the whole of the material coming under one number is worth keeping or not worth keeping, that is, as a group. In the latter case, a manilla sheet, bearing its appropriate number, should be inserted in its proper place in the file, with an instruction not to keep, as *e.g.*—

444 Staff. Examinations. Papers of candidates.
These are not to be kept.

A small library with comparatively little correspondence would not probably use the full scheme, but as familiarity with the scheme increases the tendency will probably be, even in this case, to divide pretty minutely, the advantages of close classification being very great. If an assistant is told off to do the classifying and filing, it will not be necessary for the

librarian to mark the class number on his letters; he will probably find it easier to write the subject word in pencil as a guide to the classifier. The main objection to classifying correspondence is the liability of placing a letter where it cannot be found when it is wanted, but this is a danger to some extent, of even an alphabetical arrangement. It may be entirely obviated by having an alphabetical index of correspondents and entering the numbers under which each letter is filed under their names. This should be on cards or slips, and will serve as an address register, as well as an index to the correspondence. There is practically no more trouble in keeping this record than in indexing an ordinary letter book. Of course, it is presumed that copies of all replies are taken on loose sheets and filed with the original letters.

Receptacle Numbers.—Some numbers are intended not to mark material but *receptacles*. Thus a folder marked 4243 will contain letters, memoranda and other material to be submitted to the chairman. This material, therefore, only temporarily rests in 4243, on its way to be permanently filed in various other numbers. Similar receptacle numbers are 551–555, etc.

Forms and Supplies.—Forms and supplies are conveniently marked by the class number followed by a special letter mark for the form. In many cases special numbers are allotted to supplies; where there is no special number the supply will take the number of the subject or process concerned. Thus 646 being the process of plating, book plates or board labels will be marked 646.

Some Examples of the Marking of Supplies.

6686 A Catalogue card, thin,
6686 Am Catalogue card, medium
6686 B Catalogue card, blue
6686 S Catalogue Card, salmon
6687 F Guide card, cut in fifths, blue
6687 Fb Guide card, cut in fifths, buff

Bulky supplies may be labelled with a luggage label, and arranged in flat boxes or drawers.

Separating Current from Old Material.—This is best done by inserting a manilla sheet in the folder and filing current or " to be dealt with " papers in front of it

Departments.—When it is necessary to classify for a department separately, *e.g.*, School libraries, use a letter to indicate department in front or behind the class numbers. Usually the letter will come most conveniently in front, *e.g.*, Sch65 School libraries stock; but in cases where a parallel classification is not wanted, the letter should succeed, *e.g.*, 651R Reference stock book.

Pointing the Numbers.—As all the numbers are decimal, they need not be pointed, but to enable the sequence to be readily grasped it is suggested that in writing the numbers a point should be inserted after every third figure, thus, 585.532.32 Catalogues of drawing inks, is easier to read than 58553232.

421 Election. Co-opted members
422 Powers
423 Standing orders
424 Chairman
4243 Matters to be submitted to Chairman
4245 Vice-chairman
425 Clerk
426 Minutes
427 Notices of meeting
428 Agenda. Notices of motion
4285 Attendances
429 Next meeting
4291 Reports. Returns
4292 Periodical (fortnightly, monthly or quarterly)
4294 Annual
4295 Next annual
4296 Special
(Subdivided like the main classification. It is best to keep two copies one here, and one with the subject. This is only for reports presented to the committee; reports obtained by the librarian for his own use are 577)
43 **Sub-Committees**
431 Finance
432 Officers
433 Books
434
435 Buildings. Sites
436 Branches. Divisional committees
437 Visiting
438 Other
439 Temporary
(The above may all be subdivided like 42 Committee)
44 **Staff**
4406 Staff insurance. Superannuation
441 Vacancies. Advertising. Applications

44111 Clerk
44112 Chief librarian
44113 Sub-librarian. Deputy librarian
44114 Branch librarians. Librarians-in-charge. Heads of departments
44115 Senior assistants
44116 Junior assistants
44117 Extra staff. Evening, Sunday, Holiday
44118 Janitors. Cleaners
44119 Other
441192 Typists
441195 Pages. Messengers
441197 Binders
441198 Engineers
442 Interim applications
443 Examinations
444 Papers of candidates
445 Selected candidates
446 Appointments
(442–6 are subdivided like 441)
447 Salaries
448 Staff rules
449 Hours. Time sheets
45 **Staff** (*contd.*)
451 Absences. Sick leave
452 Holidays
453 Duties
454 Special
455 Reports. Record of merit
456 Training. L. A. classes. Library schools
457 In the library
458 Staff meetings
459 Testimonials, *i.e.*, given by librarian or committee
46 Rules and regulations
461 General
(Definitions. Duties and powers of librarian)
462 Hours of opening and closing
463 Membership. Readers' qualifications
464 Home use of books
465 Reference use
(This includes news and magazine rooms)
466 Care of books. Bookmarks
467 Order in building
468 Special regulations
469 Actions at law. Prosecutions

48 **Relations with other Corporation Committees**

These numbers may be subdivided for sub-committees, if wished. Both committee and sub-commitee numbers may be further divided like 42, but the divisions of 42 must be preceded by a cypher when used with Committee numbers to prevent confusion with figures in fourth place indicating sub-committees, thus: —

488 Education committee
48806 Minutes
4886 A sub-committee of Education committee
48866 Minutes
482 Finance committee
483 General purposes committee
484 Sanitary committee
485 Watch committee
486 Parks committee
487 Tramways committee
488 Education committee
489

49 **Relations with other Corporation Departments**

(Letters conveying resolutions or written by instruction of a committee go in 48. General correspondence with officials goes here. Under the principal official goes all correspondence with his department)

491 Town Clerk
492 Accountant. Treasurer

493 Engineer
494 Medical officer. Inspector of Nuisances
(Communications *re* infected books go in 7139)
495 Chief constable. Police
496
497 Tramways manager
498 Clerk to education committee
499

5 **EXECUTIVE**
51 **Finance**
511 Estimates. Budget
512 Income. Cash receipts
5121 Rate
5122 Endowment
5123 Investments
5124 Grants
5125 Rent
5126 Donations
5127 Subscriptions
5128 Fines. Damages
5129 Other sources
51291 Borrowers' replacements
51292 Deposits
51293 Interest
51294 Sales
51295 Publications
(May be subdivided like 8, *e.g.*, Sale of Catalogues512951, of library magazine 512958)
51296 Books. Periodicals, etc.
(May be subdivided like 62, *e.g.*, sale of second-hand books 512963)
51297
51298 Waste paper
51299 Sales for other departments or institutions
513 Requisitions
5135 Approved
514 Quotations
(Both 514 and 513 may be subdivided like the main classification, *e.g.*, 51471811 Quotations for burghers' vouchers)
5145 Accepted
515 Order book
(Book, etc., orders are 621. This is *general* order book. Correspondence *re* orders takes this number, and may be arranged in sequence of order numbers.)
516 Bills unpaid
5161 Checked
5162 Allocated. Analysed
5163 Queried
5164 Entered in ledger
5165 Prepared for committee
5166 Approved for payment
5167 Cheque book
5169 Payment deferred
517 Expenditure. Bills paid

5561 Exchange calls "in." Messages
5562 Calls "out"
5563 Trunk calls "out"
5564 Branch telephones. Private wires. Calls "in"
5565 Calls "out"
5566 Directory

5567 Inter-departmental telephones
5568 Abortive calls. Complaints
5569 Telegrams
557 Interviews. Deputations. Call book
558 Copying. Copying press
5585 Copying supplies
559 Correspondence file. A—Z
(Correspondence is best classed by subject, leaving only sundries here. See preliminary remarks)
56 **Office**
561 Memoranda. Office tickler
562 Diary
563 Staff time book
564 Orders for the day. Work book. Routine calendar
565 Work in hand
(Standing jobs, other than routine work)
566 Work to be done
(This is work waiting, but not actually in hand)
567 Standing instructions
(This is the library's manual of method—how to do things. Subdivided like the main classification)
568 Matters requiring attention
569 Ideas. Projects
57 **Office** (contd.)
571 Typewriting. Typewriter machine
572 Typewriter supplies
573 Duplicating. Duplicator machine
574 Duplicator supplies
575 Printing. Copy
(Except catalogue copy 663, and magazine copy 881)
576 Proof
577 Reports. Returns
(Obtained by the librarian for his own use. If for committee they go in 4296. Divided like the main classification)
578 Departmental
Subdivided by any figures of the main classification indicating departments. Note that two figures should be used for the departments in class 7, thus :—
57871 Lending library
57874 Branches
Other departments are then marked :—
57862 Order dept.
57866 Cataloguing dept., etc.
This head is for general reports on the work of the department. Reports on particular matters go in 577
579 Reports "out"
(These are reports and returns made to other libraries, individuals, etc., on the work of the library. May be be subdivided like the main classification)
58 **Office** (contd.)
581 Statistics
(General. Statistics of stock are 659; of cataloguing 66699; of classification 678; of lending issues 7129; of registration 7189; of reference issues 7239; of newsroom attendance, 739)

582 Register of official supplies and forms. Samples
(On treatment of official forms and samples of supplies, see preliminary remarks)
583 Other supplies
584 Register of fittings
585 Catalogues of supplies and fittings
(Kept here, but divided like the main classification. General catalogues of library appliances are marked 38)
586 Recipes
(Divided like the main classification)
587 Notices. Bills
(Whether written or printed. Divided like the main classification. Circulars are 28)
589 Library council
(This is for meeting of librarian and heads of departments General staff meetings are 458)

6 **ACCESSION. DESCRIPTION. CONSERVATION**

61 **Selection**
611 Books
6112 On approval. Personal examination
6113 Guides
6115 Reviews
6116 Marked
612 Catalogues
6121 Publishers' catalogues
6122 British

6134 Suggestions by members of committee
61345 Queries. Doubtful books
6135 Books enquired for
6136 Duplicates
6137 Replacements
6138 Suggestions submitted to committee
6139 Suggestions approved
61395 Suggestions deferred
61396 Suggestions disapproved

4 Newspapers and magazines
45 Excisions
46 Specimen numbers
5 Pictures and photographs
6 Books for the blind
7 Lantern slides
(The above heads are subdivided like 611 Books, using the figures after 61)

Purchase
03 Prices, nett book question
1 Order book
(This is for books and other material classed in 62. General order book is 515)
:2 New books
:3 Secondhand books
:4 Newspapers and magazines
:5 Pictures and photographs
:6 Books for the blind
:7 Lantern slides
:8 Manuscripts
Subdivisions for use under above numbers (621 is not divided) :—
1 On order
(For records of material on order other than order book, 621, *e.g.*, Card register of secondhand books on order, 6231)
15 On hire
(*e.g.*, subscription to a circulating library of books, 62215; of lantern slides, 62715)
2 Works in progress
3 Annuals. Continuations
4 Subscriptions
45 Replacements
5 Reports
(Other than offers)
55 Lists of wanteds
6 Offers
62 Accepted
65 Orders not filled
7 Orders held back
75 Orders countermanded
8 Register of vendors
9 Auction sales

63 **Donations**
631 Acknowledgment
6315 Accepted. Donation book
(All offers go in 631 or 6315, not under the heads below)
632 Requests for donations
633 Books
6332 Works in progress
6333 Annuals. Continuations
634 Newspapers and magazines
Check list
635 Pictures and photographs
637 Books for the blind
638 Lantern slides

64 **Book processes**
641 Collating
642 Allocation to departments and libraries
643 Sizing
644 Cutting
645 Stamping
646 Plating
647 Tagging
649 Examination shelves

65 **Stock**
651 Stock books
652 Additions catalogue, current year
6525 Additions catalogue, prior to current year
653 Ephemerae
(Not permanently preserved)
654 Reserve
655 Exchange
656 Withdrawn. Worn out. Imperfect
6562 To be replaced
6565 Not to be replaced
657 Weeding out, examination of topics on shelves

6575 Books discarded
6578 Disposal of books, periodicals, etc., other than by sale and exchange
658 Missing
6585 Missing, found
659 Statistics
66 **Cataloguing**
6603 Various forms compared. Dictionary *v.* classed, etc.
6605 Annotation. Evaluation (Pro and con. Discussion of general principles)

6998 Supplies
(Except covering materials 691)
6999 Lettering tools and supplies
(Process is 6928)
7 **DEPARTMENTS**
71 **Lending Library. Loan**
7102 Lending *v.* reference
7104 Open access. Open *v.* closed shelves
(General and loan. Access to reference shelves is 7204)
711 Charging
71103 Charging systems
71104 Ledger
71105 Cards. Slips
71106 Indicator
712 Issue
7121 Books in. Cards, indicator, ledger
7122 Restricted. "Starred" books
7123 Bespoken. Retained
7124 Stopped for examination
(? wrong classification, undesirable, etc.)
7126 Renewals
7128 Records. Checks. Call slips
7129 Classification of issues. Statistics. Issue sheets
713 Return
7131 Books out
7132 Inter-library loans
(These are loans within the library system, *e.g.*, from central to branch or branch to branch)
7133 Inter-library discharges
(These are books borrowed at one library and returned to another)
71333 Loans to other departments
(*e.g.*, Lending loan to reference dept. or cataloguing room)
71335 Special loans, *e.g.*, lectures, schools, other libraries
71337 Books in process loaned
7134 Reference books loaned
7135 Overdues. Fined
7136 Posted
7137 Damaged. Lost
7138 Defaulters. Personal application
71385 Reported to Town Clerk
7139 Infected. Returned to sanitary department
714 Errors. Queries. Temporary book cards, tickets
715 Enquiries. Suggestions. Complaints
(This will take all enquiries, suggestions and complaints as to *management*, irrespective of department. Enquiries as to book guidance, etc., are 725)
716 Staff notice board
717 Fittings and supplies
(Indicators are 3852)
7171 Trays. Ledgers
7172 Guides
7174 Sorting trays
7176 Book cards. Indicator books
7178 Pockets
718 **Registration**
7181 Applications. Vouchers
71811 Burgess
71812 Non-burgess
71813 Deposit
71815 Teachers'
71816 Juvenile. School children

71817 Non-resident: privileged, non-paying
71818 Subscribers
7182 Readers' tickets
71821 Ordinary
71822 Extra (non-fiction)
71825 Music
71826 Illustrations
71827 Teachers'
7183 Checking. Readers' numbers
7184 Tickets not issued. Applications not in order. Queries
7185 Expiry. Renewals
7186 Members' register. Names
7187 Numbers
71875 Guarantors
7188 Suspended. Black list
7189 Statistics
72 **Reference Library**
7204 Open access (Reference only)
721 Signature book
722 Charging
723 Issue
7231 Application forms. Call slips
7232 Service. Delivery
7234 Home reading
7237 Restricted, "starred" books
7239 Statistics
724 Return
7241 Books in use
7242 Discharge
725 Enquiries. Information desk
(This is for all enquiries relating to books, requests for guidance, etc., whether coming through the lending or reference departments. All other enquiries are 715)
726 Staff notice board
727 Shelf permits
728 Copying
7281 Notetaking
7282 Copying extracts, MSS.
7283 Copying illustrations
(Not photographic processes, which are 7287)
7284 Completing imperfect books.
(*e.g.*, supplying title pages, etc. This is *copied* matter; completing by obtaining printed matter from publishers, etc., is 656)
7287 Photography. Camera
7288 Accessories and supplies
729 Reading and aids
7291 Personal guidance
7292 Use of reference books
7295 Courses of reading
7296 Choice of editions
73 **News and Magazine Rooms**
(Many matters bearing on newsroom management go elsewhere, thus, supervision is 467; periodical check list is 6241; filing periodicals is 6893; furniture and fittings go in 386)
7301 Desirability
7304 Blacking out
(Discussion of the question. Process is 733)
732 Methods of arrangement and display
733 Preparing newspapers and periodicals for tables
735 Notice boards
(The boards themselves and their looking after; not the matter which goes on them. Covers all the notice boards in building)
739 Statistics
74 **Library System. Branches**
(General and for the branch system as a whole. Individual

branches are indicated by letters, preceding or following any class number, *e.g.*, T69 01 69T Binding at Thornton Heath branch)

75 **Children's libraries and reading rooms**

76 **School libraries**
(Ordinary class numbers are used, preceded or followed by the letter abbreviation for school libraries, *e.g.*, Sch621 Book Order - book, school libraries. This is general and for heads *peculiar* to school libraries)

77 **Other library departments**

771 Delivery stations

772 Travelling libraries

78 **Museum**
(This is only for heads peculiar to museums)

79 **Art Gallery**
(This is only for heads peculiar to art galleries)

8 **PUBLICATIONS**

806 Free list

807 Exchange list

808 Stock

809 Advertisements
(Except in magazine, which are 889)

81 **Catalogues**

82 Author

83 Dictionary

84 Classified. Subject lists

845 Pictures and photographs

M	LANGUAGE AND LITERATURE	RECORD
N	LITERARY FORMS	RECORD
O–W	HISTORY, GEOGRAPHY	RECORD
X	BIOGRAPHY	RECORD

SUMMARY TABLE OF MAIN CLASSES.

With Abbreviated Numbers for classifying small Collections, and qualifying other subject numbers.

A—GENERALIA.

A0 GENERALIA
A1 EDUCATION
A3 LOGIC
A4 MATHEMATICS
A5 GEOMETRY
A6 GRAPHIC AND PLASTIC ARTS
A9 GENERAL SCIENCE

B, C, D—PHYSICAL SCIENCE.

B0 PHYSICS, DYNAMICS
B1 MECHANICAL ENGINEERING, MACHINERY
B2 CIVIL ENGINEERING
B3 ARCHITECTURE
B5 RAILWAYS, VEHICLES
B6 TRANSPORT, SHIPBUILDING, SHIPPING
B8 NAVAL AND MILITARY SCIENCE
C0 ELECTRICITY
C1 OPTICS
C2 HEAT
C3 ACOUSTICS
C4 MUSIC
C8 ASTRONOMY
D0 PHYSIOGRAPHY
D1 HYDROGRAPHY, HYDROSTATICS
D2 METEOROLOGY, PNEUMATICS, HOROLOGY
D3 GEOLOGY, PETROLOGY
D4 CRYSTALLOGRAPHY, MINERALOGY
D6 METALLURGY, MINING, METAL TRADES
D7 CHEMISTRY
D9 CHEMICAL TECHNOLOGY

E, F—BIOLOGICAL SCIENCE.

E0 BIOLOGY, GENERAL
E1 BOTANY, GENERAL, ORDERS
E2 — CRYPTOGAMS
E3 — PHANEROGAMS (Gymnospermæ)
E4 — — LILIIFLORÆ (Haemodoraceæ)
E5 — — CENTROSPERMÆ (Cynocrambaceæ)
E6 — — ROSACEÆ (Roses)
E7 — — SAPINDALES (Sabiaceæ)
E8 — — UMBELLIFLORÆ (Umbelliferæ)
E9 — — TUBIFLORÆ (Gesneraceæ)
F0 ZOOLOGY, GENERAL, PROTOZOA
F1 — METAZOA
F2 — MOLLUSCA, ARTHROPODA (Crustaceæ)
F3 — ARTHROPODA (Insecta)
F4 — CHORDATA, PISCES
F5 — REPTILIA
F6 — AVES (Birds)
F7 — MAMMALIA
F8 — — (Ungulata)
F9 — — (Carnivora)

G, H—ETHNOLOGICAL AND MEDICAL SCIENCE.

G0 ETHNOLOGY
G2 HUMAN ANATOMY, PHYSIOLOGY
G3 PATHOLOGY
G4 MATERIA MEDICA, PHARMACY
G5 THERAPEUTICS, MEDICAL AND SURGICAL SCIENCE (General)

G6 FUNCTIONS, DISEASES, OSTEOLOGY
G7 NERVOUS SYSTEM: BRAIN, INSANITY
G8 SENSORY SYSTEM
G9 RESPIRATORY SYSTEM
H0 BLOOD AND CIRCULATION
H1 DIGESTIVE SYSTEM
H2 URINARY SYSTEM
H3 REPRODUCTIVE SYSTEM
H4 SKIN AND HAIR
H5 PARASITICAL, INFECTIOUS AND OTHER DISEASES
H6 AMBULANCE, HYGIENE AND BURIAL
H7 PHYSICAL TRAINING AND EXERCISES
H8 FIELD SPORTS
H9 RECREATIVE ARTS

I—ECONOMIC BIOLOGY AND DOMESTIC ARTS.

I0 AGRICULTURE, DAIRY FARMING
I1 VETERINARY MEDICINE
I2 MILLING, GARDENING, FORESTRY
I3 WOOD WORKING
I4 TEXTILE MANUFACTURES
I5 CLOTHING TRADES
I6 COSTUME, JEWELLERY
I7 VEGETABLE AND ANIMAL PRODUCTS
I8 FOODS AND BEVERAGES
I9 GASTRONOMY, DOMESTIC ECONOMY

J, K—PHILOSOPHY AND RELIGION.

J0 METAPHYSICS
J1 AESTHETICS, PSYCHOLOGY
J2 ETHICS
J3 PHILOSOPHY
J4 THEOLOGY, RELIGION, GENERAL
J5 MYTHOLOGY, FOLK LORE
J6 CHURCH DOCTRINES
J7 — FASTS, FESTIVALS
J8 — GOVERNMENT
K0 CHURCHES AND SECTS, NON-CHRISTIAN
K1 CHRISTIAN CHURCHES, BIBLE
K3 CHRISTOLOGY
K4 EARLY AND EASTERN CHURCHES
K5 MONACHISM
K6 LATIN CHRISTIANITY, ROMAN CATHOLICISM
K7 PROTESTANTISM, EPISCOPAL CHURCHES
K8 NONCONFORMITY
K9 PRESBYTERIANISM AND MISCELLANEOUS

L—SOCIAL AND POLITICAL SCIENCE.

L0 SOCIAL SCIENCE
L1 POLITICAL ECONOMY
L2 — SCIENCE, GOVERNMENT
L3 CENTRAL AND LOCAL ADMINISTRATION
L4 LAW, INTERNATIONAL, GENERAL
L5 — TRIALS, ACTIONS
L6 — CRIMINOLOGY, POLICE, PENOLOGY
L7 CONTRACTS, PROPERTY AND TENURES
L8 COMMERCE AND TRADE, MONEY
L9 FINANCE

M—LANGUAGE AND LITERATURE

M0 LANGUAGE, GENERAL
M1 LITERATURE, GENERAL
M2 AFRICAN AND ASIATIC LANGUAGES AND LITERATURE
M4 EUROPEAN LANGUAGES AND LITERATURE (Latin, etc.)
M5 EUROPEAN LANGUAGES AND LITERATURE (Teutonic)
M6 AMERICAN LANGUAGE
M7 PALÆOGRAPHY, BIBLIOGRAPHY, HISTORICAL TYPOGRAPHY
M8 PRACTICAL PRINTING AND BOOKBINDING
M9 LIBRARY ECONOMY

N—LITERARY FORMS.

N0 FICTION
N1 POETRY
N2 DRAMA
N3 ESSAYS AND MISCELLANEA

O—UNIVERSAL HISTORY, GEOGRAPHY AND AFRICA.

O0 UNIVERSAL HISTORY
O1 ARCHÆOLOGY
O2 UNIVERSAL GEOGRAPHY
O3 NORTH AFRICA
O4 EGYPT
O5 EAST AFRICA
O6 CENTRAL AFRICA
O7 SOUTH AFRICA
O8 WEST AFRICA
O9 AFRICAN ISLANDS

P—OCEANIA AND ASIA.

P0 AUSTRALASIA
P1 POLYNESIA, MICRONESIA, MELANESIA
P2 MALAYSIA
P29 ASIA
P3 JAPAN
P4 CHINA
P5 FARTHER INDIA, MALAY STATES
P6 INDIA
P88 AFGHANISTAN
P9 PERSIA

Q, R—EUROPE, GENERAL AND SOUTH (Latin, etc.)

Q0 EUROPE, GENERAL
Q1 TURKEY IN EUROPE
Q12 — IN ASIA
Q2 PALESTINE
Q26 ARABIA
Q3 GREECE
Q4 BALKAN STATES
Q5 ITALY
R0 FRANCE
R6 SPAIN
R8 PORTUGAL

S, T—EUROPE, NORTH (Teutonic and Slavonic).

S0 RUSSIA IN EUROPE
S15 POLAND
S2 FINLAND
S25 RUSSIA IN ASIA
S3 AUSTRIA
S34 BOHEMIA
S4 HUNGARY
S5 SWITZERLAND
S6 GERMANY
S61 HOLY ROMAN EMPIRE
S7 PRUSSIA
T0 NETHERLANDS
T1 HOLLAND
T2 BELGIUM
T4 SCANDINAVIA
T5 DENMARK
T6 NORWAY
T8 SWEDEN

U, V—BRITISH ISLANDS.

U0 IRELAND
U2 WALES
U3 ENGLAND
V0 SCOTLAND
V5 UNITED KINGDOM
V6 BRITISH EMPIRE

W—AMERICA.

W0 AMERICA, GENERAL
W02 CANADA
W08 INDIAN TRIBES
W1 UNITED STATES
W5 MEXICO
W6 CENTRAL AMERICA
W63 WEST INDIES
W7 SOUTH AMERICA
W72 BRAZIL
W8 ARGENTINA
W9 POLAR REGIONS

X—BIOGRAPHY.

X0 COLLECTIVE AND CLASS BIOGRAPHY
X08 HERALDRY
X11 ORDERS OF KNIGHTHOOD
X2 EPITAPHS
X21 PORTRAITS, etc.
X3 INDIVIDUAL BIOGRAPHY, SUBDIVISIONAL TABLES

Classification Tables.

A. GENERALIA. GENERAL SCIENCE.

A

000 **Encyclopædias.** Dictionaries
001 **Collections** (Polygraphy)
002 Several Authors
003 Single Authors (Collected Works). *Arrange by Biographical Numbers*
004 **Concordances**
006 **Societies.** Associations (*Divide by National Nos.*)
007 **Congresses. Festivals.** Eisteddfod, etc., General. (*Divide by National Nos.*)
008 **Exhibitions.** Shows (*Divide by National Nos.*)
009 **Museums** (*Divide by National Nos.*)
010 **Recipes**
011 **Inventions**
012 **Patents**
013 Specifications (*Divide by National Nos.*)
014 Patent Agents
015 Patent Offices or Departments (*Divide by National Nos.*)
040 **Annuals.** Year Books
050 **Periodicals** General
051 Magazines —
052 Reviews —
053 Newspapers —
060 **Chap Books,** General
070 **Broadsides,** Leaflets, General

Note.—All Periodicals from 050 to 070, *when on special subjects, must be numbered with their Subject-Numbers.*

100 **EDUCATION**
101 **State Education**
102 State Aid
103 Education Departments or Ministries of Instruction (*Divide by National Nos.*)
104 Compulsory Education

A

105 Illiteracy
106 Secular Education
107 Religious Tests
110 **Methods of Teaching** (Pedagogy)
111 Lectures
112 Classes. Class Lessons. Forms
113 Laboratories
114 Methods of Study
115 **Educational Systems**
116 Infant Education. *See also* G110 Children

145 Registers and Time Tables
146 Pupils. Students
147 Discipline
148 Punishments
149 Home Lessons
150 Object Lessons
151 Marks for Lessons

A
152 Teachers
153 Head Teachers
154 Class —
155 Pupil —
156 Monitors
157 Tutors (Governesses) Ushers. "Coaches"
158 Public Schools
159 Fagging
160 Academies
161 Endowed Schools
162 Church Schools
163 Monastic Schools
164 Voluntary Schools
165 Boarding Schools
166 Private Schools
167 Truant Schools. Truants
168 Ragged Schools
169 Industrial Schools
170 Pauper Schools
171 Other Schools
180 **Universities**
181 Professors. Fellows
182 Matriculation
183 Graduation
184 Graduates
185 Degrees
186 University Extension

300 **LOGIC** (Dialectics)
301 Propositions (Assent, Doubt)
302 Names, Terms, Definitions (Nomenclature)
303 Reasoning (Argument)
304 Syllogism
305 Induction
306 Deduction
307 Observation
308 Experiment
309 Hypotheses
310 Generalization
311 Analogy
320 Classification (Methodology)
330 Fallacies. Errors

400 **MATHEMATICS**
401 **Arithmetic**
402 Numeration and Notation
403 Arabic Numerals
404 Roman Numerals

A
405 Greek Numerals
406 Other Numerals
407 Prime Numbers and Factors
408 Addition
409 Subtraction
410 Multiplication
411 Division
412 Fractions
413 Decimals
414 Analysis. Combinations. Permutations
415 Ratio and Proportion. Progression
416 Involution and Evolution
417 Bills of Parcels
418 Calculating Machines
419 Abacus
420 Mental Arithmetic
425 Arithmetic and Algebra, together
430 **Algebra**
431 Equations
432 Fractions
433 Binominal Theorem
434 Analysis
435 Proportion and Progression
436 Involution and Evolution
437 Higher Algebra
438 Determinants
439 Probabilities
440 Accidents
441 Chance
442 Luck
443 Logarithms
450 **Weights and Measures** (Metrics)
451 British Weights & Measures
452 Foreign Weights & Measures
453 Obsolete Weights & Measures
454 Metric System
455 Standardization of Weights, etc.
456 Measuring Machinery (Gauges, Meters, Rules, Slide Rule)
460 **Statistics,** General. (*Special statistics goes with subject*)
461 Records and Results, General
470 **Bookkeeping** (Accounts)
471 Accountancy. Accountants

A

472 Single-Entry Bookkeeping
473 Double-Entry —
474 Other Systems
475 Cost Accounts
476 Stock Keeping
477 Stock Taking and Valuation
478 Profit and Loss
479 Invoices and Statements
480 Cash Book
481 Ledger
482 Day Book
483 Other Books and Records
484 Assets. Receipts
485 Liabilities. Expenditure
486 Balance Sheets. Budgets
487 Auditing. Auditors
488 Estimating. Estimates (Bids)
489 Specifications
500 **Geometry**
501 Euclidian Geometry
502 Modern Geometry (Non-Euclidian)
503 Fourth Dimension
504 Analytical Geometry
505 Plane Geometry
506 Solid (Volumetric) Geometry
507 Curvilinear Geometry
508 Quadrature
509 Conic Sections
510 Descriptive Geometry
511 Projection
512 Perspective
513 Shadows
514 Stereotomy
515 Mathematical Drawing
520 **Calculus**
521 Differential
522 Integral
523 Quaternions
524 Functions
525 Finite Differences
530 **Trigonometry**
531 Plane
532 Spherical
540 **Mensuration**

600 **GRAPHIC AND PLASTIC ARTS. (The Pictorial Record)**

A

601 **Fine Arts,** General
602 National Divisions (*Divide by National Nos.*)
603 **Drawing and Painting**
Methods:—
604 Drawing, alone
605 Freehand Drawing
606 Model Drawing
607 Drawing for Reproduction
608 Book Illustration
609 Blackboard Drawing
610 Silhouette Drawing
611 Copying
612 Drawing Copy Books and Cards
613 Pantagraph
614 Painting, alone
615 Oil Painting
616 Water Colour Painting
617 Monochrome —
618 Encaustic —
619 Gesso —
620 Tempera (Distemper)
621 Brush Work
622 Other Methods
Mediums:—
623 Pencil Drawing
624 Chalk —
625 Charcoal —
626 Crayon (Pastels) —
627 Pen and Ink —
Subjects:—
628 Animal
629 Figure
630 Genre
631 Artistic Anatomy
632 Nude Studies
633 Draped Studies
634 Portraits
635 Miniatures
636 Caricature
637 Cartoons
638 Sketching from Nature
639 Landscape
640 Marine (Seascapes)
641 Plant Studies
642 Flowers
643 Fruit
644 Trees

Divide by Methods and Mediums

A

645 Frescoes
646 Scene Painting
National Schools of Painting :—
650 Ancient Schools
651 Oriental, General
652 Egypt
653 Japan

020 **Individual Authors.** *Arrange alphabetically under real names by numbers of Biographical Table. Anonyma at end. Original Texts with translations. For convenience in charging in a Lending Library, it will be found best to ignore the Class Letter and Number in General Fiction, and use the Biographical Numbers for Authors only.*

Fiction may be distributed according to its ascertained subject matter, by adding the Fiction number from the Categorical Table to any subject number thought appropriate. Historical Fiction in particular lends itself to this method of classification.

In using this Table for marking books in small libraries, the two-letter combinations will be found ample for all practical purposes. A series of Authors in Fiction or Poetry, or of Subjects in Biography, would be marked and distinguished as shown on the *left* of the names below :—

352	Cable	352337	363	Clark	363317
	Cade	352382		Clemens	363416
356	Cervantes	356759	366	Collins	366567
	Cettinge	356824		Cosway	366801
359	Chambers	359312	369	Crawford	369322
	Chubb	359832		Crimp	369520

If greater subdivision is required, this can be obtained by combining the two-letter numbers, as shown on the *right* of the names above. To mark books in large libraries the three-letter combinations should be used, as they provide for most ordinary biographical names. In cases where no provision is made for certain alphabetical combinations of three letters, the numbers are to be treated as decimals, so that, as a rule, ten or more new numbers can be inserted, if necessary, between each of the existing numbers. The examples following show this clearly, the numbers on the *left* being the ordinary symbols for three-letter combinations, while those on the *right* show how additional combinations and their numbers can be inserted :—

	Cable	3520	3600	Ciba	
	Caccini	35200		Cicci	36000
3521	Cade		3630	Clark	
3563	Cervantes		3633	Clemens	
3564	Cessio		3635	Clibborn	
	Cettinge	35640	3637	Clown	
3590	Chambers		3638	Cluse	
3592	Cheesewright		3662	Collins	
3593	Chichane		3663	Comerford	
	Chladni	35933	3664	Connie	
3594	Chore		3665	Coote	
3596	Chubb			Cope	36650
	Chyle	35963		Coquelin	36651
360	Ciaca				

The main advantages of this scheme are that it gives a constant place for any kind of alphabetical combination; it insures perfect numerical and alphabetical order: in many cases the numerical symbol is less lengthy than the full names, and it provides for the needs of any kind of library. The disadvantages of all previous schemes have been their merely partial character, and the impossibility of determining exactly how a new name was to be marked. This fixed place Table will doubtless satisfy those who prefer that alphabetical combinations should be translated into a numerical progression, but at best, as already stated in the Introduction, the method is a makeshift one, which, in a great many cases, is unnecessary.

Subject Classification:

WITH COMPLETE INDEX, TABLES FOR SUBDIVIDING SINGLE SUBJECTS, AND DESCRIPTIVE INTRODUCTION.

By JAMES DUFF BROWN,

BOROUGH LIBRARIAN, ISLINGTON.

Author of "Manual of Library Economy," "Manual of Library Classification," "Biographical Dictionary of Musicians," etc.

THE need for a simple and easily-applied system of exact classification has long been felt, especially in the United Kingdom, where, owing to the lack of a suitable and complete method, systematic classification has been somewhat neglected in libraries of all kinds. The Subject Classification is an entirely new scheme, in which all main classes and subjects have been brought up to date, and detailed more thoroughly for practical purposes than in any other system. The problems and difficulties of classification are dealt with in a logical, yet simple manner, and care has been taken to eliminate as far as possible the confusion introduced in many quarters by the tendency to regard classification and cataloguing as the same thing. The scheme is divided roughly into four main parts—

Descriptive Introduction.

In this will be found a full explanation of the system and its applications; tables and rules for the subdivision of single topics; and various remarks on the general theory of Classification. Here also appears Mr. L. Stanley Jast's tables for the numbering and subdivision of articles, literature and all matters connected with Library Economy, forming a very complete example of minute classification applied to a single topic. In addition, various methods of arranging subjects by dates, authors, etc., are also described.

The Main Tables.

In the Main Tables of the Classification, all formal divisions have been omitted and transferred to the Categorical Tables, mentioned below, so that every class or subject is allowed to expand naturally, without any attempt to confine it within the limits of a special notation. All classes are very fully set out, and in many cases the dates of historical events, reigns of all monarchs, and other important matters are supplied. The book is thus suitable for colleges, schools and other educational institutions. Such subjects as Physics, Biological Science, Medicine, Modern Technology in all its branches, Religion, Law, History, Geography, etc., are tabulated more fully and in greater detail than in any other existing classification, and in every department the subjects have been brought up to date.

The Categorical Tables.

These form an important new feature, whereby a separate series of forms, phases and other qualifying factors are provided, which can be applied to every subject, and so relieve the main tables from congestion. They are applicable to the very largest libraries, and give ample means of subdividing any topic, however large it may be. They can also be used with other systems of classification, as they are independent of the main tables, and form a series of parallel numbers by which the classification numbers can be themselves classified. For example, a library may have 1000 books on a subject like Architecture in general, to all of which the simple number B300 would be applied. By adding the qualifying numbers from the Categorical Tables, which appear after a point, and are invariably the same when applied to any subject, the following subclassification would result, which has the effect of assembling all related forms of books together :—

B300	Architecture,	General
B300.1	—	Bibliography
B300.2	—	Dictionaries
B300.3	—	Textbooks, Systematic
B300.4	—	— Popular
B300.6	—	Societies
B300.7	—	Periodicals
B300.10	—	History

and so on.

If, in addition to those general works, the library possessed several hundreds of books on Building Construction, B305, these would be subdivided in exactly the same manner, as would also any subdivision of the same topic, such as Foundations, Walls, Roofs, etc. :—

B305.1	Building	Construction,	Bibliography
B305.3	—	—	Textbooks, Systematic
B305.10	—	—	History
B329.1	Roofs, Bibliography		

These Categorical Tables are therefore of universal application, and as they contain nearly one thousand qualifying forms, phases, etc., it will be seen that their use will greatly simplify the practical work of Classification.

Notation.

As will be seen by the above examples, the symbols are perfectly simple combinations of letters and numbers. By treating the numbers decimally, it is possible to intercalate as many new ones as desired between any of the existing numbers, thus providing an infinity of places.

Index.

The Index is very extensive in the number of subject-words it contains, and comprises practically every topic likely to be encountered in ordinary practice. The Classification Tables themselves provide places somewhere for every remote subject, and the Introduction describes how such out-of-the-way matters are to be treated.

Uses.

The system can be used for classifying books, documents, articles, or any group of objects connected with human activities or knowledge. It is also capable of being used for teaching and business purposes, because it tabulates the whole field of science, art and record, and displays related subjects in one clear view. For instance, places have been found for nearly all plants of economic value, or which are popularly esteemed, in addition to the larger scientific orders, groups, species, etc., to which they belong; and it is believed this is the first time, in any system of

classification, an attempt has been made to show all useful or popular trees, flowers, fruits, etc., in their scientific relationships, under their common English names. So with all great subjects; each division or single part is set out in the fullest detail, so as to secure the advantage of a very wide series of whole numbers of equal value. The Tables can be used by the specialist just as easily as by the general collector, because means are provided whereby anyone can assemble at his favoured places all his relative literature or facts. On the other hand, an important object of the scheme is to supply a "one place" classification, which shall free librarians, in particular, from the perplexities induced by phase, form, and standpoint classification, which in reality is a branch of cataloguing. Anyone who wishes to simplify the process of classifying books, has only to use the Index numbers, qualified by those from the Categorical Tables, and follow the easy rules for determining the choice of subject, and he will be saved from many of the difficulties and doubts which at present surround book classification.

It is impossible in a brief prospectus to set forth all the features of this System of Classification—its elaborate series of *biographical numbers* for arranging Fiction, Poetry and other alphabetical classes; its new system of short *date-marks;* its rules for the *arrangement of special subjects,* authors, etc.; and its notes on the simplification of the whole subject of book classification. Reference can only be made to the Summary Table of Main Classes and specimen page of the Index appended to this for an idea of the size and style of the book.

SUBJECT CLASSIFICATION.

Summary Table of Main Classes, with Abridged Notation.
